Graduate Programme/Internship

Duties of Position

Douglas Control & Automation are seeking a junior Mechanical Design Engineer to join our ever growing team in Carlow.

We are the longest established Irish company in the automation sector, with an enviable record of successfully implemented, innovative and cost effective projects.

Our customers cover the entire manufacturing and utilities sectors and include pharmaceutical, biotech, chemical, semiconductor, food and beverage, mining, transport and water treatment industries.

Requirements:

- SolidWorks or equivalent CAD experience with the ability to create 3D drawings and 2D draft drawings. (SolidWorks cert a bonus)
- Problem solving and good initiative.

- Ability to design mechanical components and assemblies for automated machines.
- Basic electrical knowledge and experience.
- Work well in a team environment.
- Ability to perform mechanical assembly tasks, basic tool experience (drill, grinder, etc)
- Good documentation skills. Must be capable of inputting design details into specification documents.
- Must be willing to travel.
- Attention to detail, ability to carefully review designs and assemblies for accuracy and quality.
- Engineering degree

What We Offer:

- Competitive salary
- A collaborative and innovative work environment
- We are the longest established Irish company in the automation sector, with an enviable record of successfully implemented, innovative and cost effective projects.
