Welcome

Welcome to South East Technological University (SETU). As President of SETU, I am delighted to invite you to explore our undergraduate courses and all that SETU has to offer.

SETU is young and vibrant technological university with huge ambitions for our students, our community, and our region. With almost 18,000 students and 1,500 staff, SETU has a multi-campus presence in Carlow, Waterford, and Wexford, offering an array of courses that span apprenticeships to PhDs.

As an undergraduate student in SETU, we offer you a dynamic learning experience with over 140 industry-informed courses that incorporate work-based learning, student mobility, study abroad opportunities and a research-led curricula. In a time of rapid technological change, we aim to prepare our students for careers of the future with a regional perspective and a global reach. SETU graduates are work ready, with skills reflective of changing societal and cultural demands.

This prospectus offers a wonderful starting point to your journey of discovery, with an overview of SETU's undergraduate courses capturing an extensive range of disciplines from science to humanities and business to engineering. I encourage you to explore these courses and to visit us on our open days and sign up for our TRY events, these on-campus activities will give you an opportunity to experience SETU first hand, meeting our students and staff and experiencing student life on campus.

Fáilte

Fáilte go dtí Ollscoil Teicneolaíochta an Oirdheiscirt (SETU). Mar Uachtarán SETU, Tá an - áthas orm cuireadh a thabhairt duit iniúchadh a dhéanamh ar ár gcúrsaí fochéime agus gach a bhfuil á thairiscint ag SETU.

Is ollscoil teicneolaíochta óg bhríomhar í SETU a bhfuil uaimhianta ollmhóra aici dár mic léinn, dár bpobal agus dár réigiún. Tá beagnach 18,000 mac léinn agus 1,500 ball foirne SETU mar institiúid ilchamps atá lonnaithe i gCeatharlach, i bPort Láirge agus i Loch Garman. Tá réimse cúrsaí á tairiscint againn a chuimsíonn cúrsaí idir phrintíseachtaí agus PhDanna.

Mar mhac léinn fochéime in SETU, cuirimid eispéireas foghlama dinimiciúil ar fáil duit le breis agus 140 cúrsa atá bunaithe ar an tionscal agus a chuimsíonn foghlaim obairbhunaithe, soghluaisteacht mac léinn, deiseanna staidéir thar lear agus curaclaim faoi threoir taighde. I dtréimhse ina bhfuil athrú teicneolaíochta ag tarlú go tapa, tá sé mar aidhm againn ár gcuid mac léinn a ullmhú do ghairmeacha na todhchaí ag a bhfuil peirsipictíocht réigiúnach agus teacht domhanda. Tá céimithe SETU réidh don obair. Tá scileanna acu a léiríonn éilimh shochoíocha agus chultúrtha atá ag athrú.

Tugann an réamheolaire seo pointe tosaigh iontach do do thuras ina bhfaigheann tú eolas nua, mar aon le forbhreathnú ar chúrsaí fochéime SETU a chuimsíonn raon fairsing disciplíní idir eolaíocht agus daonnachtaí, idir ghnó agus innealtóireacht. Molaim duit iniúchadh a dhéanamh ar na cúrsaí seo agus cuairt a thabhairt orainn ar ár laethanta oscailte agus clárú dár n - imeachtaí "BAIN TRIAIL AS". Tabharfaidh na gníomhaíochtaí seo ar an gcampas deis duit taithí phraiticiúil a fháil ar SETU, bualadh lenár mic léinn agus lenár bhfoireann agus blaiseadh a fháil ar shaol na mac léinn ar an gcampas.

SETU is one of nine European universities, that form EU-CONEXUS, a European University Alliance focussed on Smart Urban Coastal Sustainability. The alliance seeks to create a hub of excellence on sustainability in this area and address the challenges experienced by urban coastal communities through research and knowledge-sharing activities. There are some wonderful opportunities available to SETU students with this membership, further information can be found by visiting www.eu-conexus.eu.

Your college years are some of the most exciting of your life; finding out who you are and what you want to be in your future career. At SETU, we are a diverse and inclusive community and we will support you in reaching your potential both academically and personally.

I wish you every success in choosing your college course. It is important to consider and reflect on what course and career is the right one for you and if we can do anything to assist you in that decision, please get in touch with our schools' liaison and admissions teams.

Thank you for considering South East Technological University (SETU).

Professor Veronica Campbell
SETU President

Tá SETU ar cheann de naoi n - ollscoil Eorpacha atá tagtha le chéile mar EU - CONEXUS. Is Comhghuaillíocht Ollscoile Eorpach é seo atá dírithe ar Inbhuanaitheacht Chósta Uirbeach Chliste. Féachann an chomhghuaillíocht le mol barr feabhais a chruthú maidir le hinbhuanaitheacht sa réimse seo agus aghaidh a thabhairt ar na dúshláin a bhíonn ag pobail chósta uirbeacha trí ghníomhaíochtaí taighde agus comhroinnt eolais. Tá roinnt deiseanna iontacha ar fáil do mhic léinn SETU tríd an mballraíocht seo. Is féidir tuilleadh eolais a fháil ach cuairt a thabhairt ar www.eu-conexus.eu.

Tá na blianta a chaitheann tú sa choláiste ar chuid de na blianta is iontaí i do shaol; gheobhaidh tú amach cé tú féin agus cad í an ghairm bheatha atá uait amach anseo. Ag SETU, is pobal éagsúil agus uilechuimsitheach sinn agus tacóimid leat d'acmhainneacht a bhaint amach go hacadóil agus go pearsanta araon.

Guím gach rath ort agus do chúrsa coláiste á roghnú agat. Tá sé tábhachtach machnamh a dhéanamh ar an gcúrsa agus ar an ngairm atá ceart duitse agus más féidir linn aon rud a dhéanamh chun cabhrú leat maidir leis an gcinneadh sin, déan teagmháil le foirne idirchaidrimh agus iontrála ár scoileanna.

Go raibh maith agat as smaoinemh ar Ollscoil Teicneolaíochta an Oirdheiscirt (SETU).

Admissions

Applying to SETU

Applicants seeking admission to first year of full-time undergraduate courses must apply through the Central Statistics Office (CAO). International applications should be made directly to the University.

Key CAO dates

Tuesday, 5 November 2024	CAO applications open
Monday, 20 January 2025	Discounted application closes
Saturday, 1 February 2025	Initial CAO application deadline
Thursday, 1 May 2025	Late application deadline
Tuesday, 1 July 2025	Change of Mind deadline
August 2025	First round of CAO offers*

*Further offers may be made in subsequent rounds if all places are not filled following the first round offers.

Standard application

Applicants that are using the following entry route are considered standard applicants;

- Leaving Certificate or QQI FET / FETAC Certificate examinations results to meet the minimum entry requirements
- No previous third level education (in institutes of technology, universities, colleges of education, colleges of art and design, or their equivalents abroad)
- Not a mature applicant (23 years of age on 1 January of the year of entry).

The University awards points for results in LCVP

Entry requirements for Honours Bachelor Degrees (Level 8)

This link module can be used in place of a sixth Leaving Certificate subject and will be accepted as meeting the six subject eligibility requirements for entry to honours degree courses.

Entry requirements for Ordinary Bachelor Degree (Level 7) and Higher Certificate (Level 6)

The LCVP link module can also be used in place of a fifth Leaving Certificate subject and will be accepted as meeting the five subject eligibility requirements for entry to ordinary bachelor degree and higher certificate courses.

GRADE	POINTS
Distinction	66
Merit	46
Pass	28

Applicants with disabilities

The University welcomes DARE applicants. DARE applicants need to complete their CAO applications by 1 February of the year of entry and submit all relevant documentation.

For more information on applying to DARE, visit: www.accesscollege.ie

Non-standard application

A non-standard application is one that does not meet the definition of a standard application.

The special categories are:

- GCE/GCSE
- FETAC Level 5/6
- Mature
- Other school leaving exams
- Further Education (other than QQI)
- Higher/Third Level Education
- NCVA Level 2/3

Applicants wishing to make a non-standard application must select the relevant category when applying to the CAO.

Mature Student Applications

A mature student is someone who is at least 23 years of age on 1 January of the year of entry to an undergraduate course and who may not meet the normal admission requirements. Applications are made through the CAO before the 1 February or before late application deadline of 1 May 2025. Applicants are assessed based on the information they enter on their CAO application. **Note:** You must apply for nursing and music courses by 1 February 2025.

Selection Process – Nursing Applications

Mature applicants for nursing courses will receive correspondence under separate cover from the Nursing Careers Centre (Public Appointments Service - PAS). For full details on the application process see www.nursingcareers.ie.

Mature Applicant – Change of Mind

The Change of Mind facility becomes available after 1 May and the closing date is 1 July. The Change of Mind facility affords mature applicants an opportunity to change the order of preference only of their course choices. If applicants introduce a new programme to their list of choices by way of Change of Mind, they will compete for a place on that programme based on their Leaving Certificate or equivalent results only. They will not compete as a mature applicant.

QQI-FET (FETAC)

Students who have completed a full QQI-FET award at Level 5, and achieved at least three distinctions, are eligible to apply through CAO for entry to Year 1 on to Level 6, 7 and 8 courses. Students who have completed a full QQI-FET award at Level 6 may be eligible to enter Year 2.

The maximum possible points awarded through QQI-FET is 390. The scoring system only applies where all of the requirements for the major award are met i.e. where the named component awards specified have been achieved to a minimum of 120 credits.

Progression Scheme

The Progression Scheme is an additional opportunity for students who successfully complete a QQI FET Award in a partner Colleges of Further Education and Training College/Centre to gain entry to SETU programmes. The list of partner Further Education and Training Colleges/Centres, relevant SETU programmes, linked QQI FET Awards and the criteria for the scheme are available at www.setu.ie/progression.

Student Support Services

The Student Support Services team at SETU provide a range of student supports that are focused on helping students both during their transition to third level and throughout their time at SETU. They provide advice and support for students and act as a hub of resources, referrals, and information across the SETU community.

The support services also aim to make the University more accessible for those who traditionally may not have considered third level education as an option for them.

The supports and services provided include:

- Academic Supports
- Access Supports
- Careers Development Centre
- Chaplaincy and Pastoral Care
- Clubs and Societies
- Disability Support Service
- Financial assistance for students who are experiencing financial hardship (e.g. Student Assistance Fund)
- Health and Wellbeing
- Information Sessions
- Peer Mentoring
- First Year Transition and Orientation
- Student Counselling
- Student Engagement and Retention Initiatives
- Student Volunteering Opportunities

HEAR Scheme

SETU is a participating member of the HEAR scheme, offering a number of reduced points course places to HEAR eligible applicants who, as a result of socio-economic disadvantage, have experienced additional educational challenges in second level education. HEAR is for school leavers under the age of 23 years on 1 January in the year of entry, who are resident in the Republic of Ireland.

Mature and FET (Further Education and Training) students have their SETU admissions routes and should contact the University Admissions office for more information. Applications to HEAR can only be made online through cao.ie.

For more information on applying to HEAR visit: www.accesscollege.ie

Carlow and Wexford Campuses:

hear.CW@setu.ie

Waterford Campus:

hear.WD@setu.ie

Student Assistance Fund

Full-time and part-time registered students who are experiencing financial difficulty whilst attending college are eligible to apply to the Student Assistance Fund (SAF). Students can apply for SAF to help them with either temporary or ongoing financial difficulties. For further information please see: www.studentfinance.ie

DARE Programme

SETU is a member of the Disability Access Route to Education (DARE) and has reserved a number of reduced points course places for DARE applicants. DARE is a third level alternative admissions scheme for school-leavers whose disabilities have had a negative impact on their second level education. DARE offers reduced points places through the CAO to school leavers who, as a result of having a disability, have experienced additional educational challenges in second level education.

For more information on applying to DARE visit: www.accesscollege.ie

Support for Students with Disabilities

The Disability Support Service provides supports to students with a range of disabilities including but not limited to, physical disabilities, sensory disabilities, specific learning difficulties, mental health difficulties, significant ongoing illness, neurological conditions, developmental co-ordinator disorder, ADD/ADHD and Autism Spectrum Disorder (ASD). In order to avail of supports, students must register with the Disability Office and provide evidence of disability. Students who register with the disability office are provided with a needs assessment through which supports are approved. Supports are varied and can include for example assistive technology, learning support, examination accommodations etc. Supports are funded through the HEA under the Fund for Students with Disabilities. For further information and appointments email:

Carlow and Wexford Campuses:

disabilityoffice.CW@setu.ie

Waterford Campus:

Sport, Clubs and Societies

At South East Technological University, sport is an integral part of the culture. The role of the Sports Department at SETU is to create an inclusive environment that helps to support students and the wider community in pursuit of their health and wellbeing, competitive and performance sports goals and ambitions.

There is a huge diversity of activities to choose from with over 100 sports clubs and societies operating across the Carlow, Waterford and Wexford campuses, catering for all standards from national and international athletes to the individual who

would like to try a new activity, join a group, or increase their social circle while enjoying their time at SETU.

James Burke
Engineering Society

I planned a trip to Germany with 42 students who studied

mechanical and manufacturing engineering to see Volkswagen in Wolfsburg and also go to BMW in Berlin. The trip was amazing and from that I've made some really great memories and friendships for life.

It's really important to be active and talk to each other as college can be stressful but rewarding. It's important to know you have people you can talk to.

James' story

Arabella Adekoya
SETU Sport Scholarship Athlete

Life at SETU brings together my passion for athletics and my interest in sports coaching. SETU offers an incredible variety of courses alongside fantastic training facilities. The chance to attend on scholarship allows me to combine my athletic and academic goals. Participation in clubs and societies has been hugely enjoyable. I got to embrace my culture through the African and Caribbean Society and discovered a passion for leadership. I am a member of SETU's Athletics Club also, where I have made lifelong friends.

Arabella's story

COMMON ENTRY

Business (Waterford)

COURSE CODE	STREAMS	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
SE400	Economics & Finance Human Resource Management Management Accounting Marketing	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Corinne Power O'Mahony EdD E: corinne.power-omahony@setu.ie

About the course

This four year full-time course offers students a broad range of business skills combined with a thorough knowledge of the financial and economic environment in which firms operate. The first two years are common and then students choose to specialise in one of the following five streams: Economics & Finance, HRM, Management, Accounting or Marketing, for the final two years.

Career opportunities

Graduates from this programme have gone on to pursue a wide variety of careers, including careers in marketing, human resource management, accounting, consulting, banking and finance. A graduate of this degree will be suitable to take up a position at a junior/middle management level in many types of business organisations ranging from small family businesses to multi-national corporations.

COMMON ENTRY — Bachelor of Business (Honours) Economics & Finance

LOCATION	COURSE CODE	CAO POINTS 2024	COMMON ENTRY ROUTE	STREAM LEAD
Waterford	SE400	Round 1: 270		SE400 (Level 8) Business (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Economics and Finance stream on the BBS (Honours) programme provides students with the opportunity to specialise in Economics and Finance for the final two years of their degree, taking modules such as Financial Economics, Economic Policy Issues, and Investments. The stream applies economics and finance concepts to key contemporary issues such as Brexit, Crypto currencies, and economic crises. Students are given the opportunity of testing theories on real-world data. The stream provides

students with skills that are hugely in demand in the market place. It provides a great

platform for postgraduate studies, with many past graduates undertaking the Economics and Finance stream of the MBS degree in SETU and several have continued their studies and obtained a PhD qualification.

Career opportunities

- Economic Policy Advisory Services
- Derivatives Trader
- Investment Analyst
- Policy Analyst

SE414 (Level 7)	Level 7: 5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	E: aileen.farrell@setu.ie

About the course

Our common entry course is a popular choice for students who have an interest in business but are unsure of what career path they would like to follow. The first two years of this course provide students with a foundation in business and subjects are common for all students.

After two years, students choose their preferred stream of study from the below list of streams. Years 3, and 4 if applicable, will then be spent specialising in this area.

SETU's Bachelor (Honours) of Business (SE401) is also offered as a tertiary degree programme with Laois and

Offaly Education and Training Board. Full details of this pathway is available on page 132.

Career opportunities

Bachelor of Business (Honours) and Bachelor of Business courses equip students with a broad business skill-base, ensuring graduates will have a wide range of career options. Expert guidance will be available from lecturing staff and ultimate choices can then be considered in light of academic performance across a range of business subject areas.

	SE414 (Level 7)	COURSE DURATION L8: 4 YEARS L7: 3 YEARS		

About the course

Culture, language, political systems, geography, finance and socio-economic factors all shape and influence business and must be understood by organisations wishing to operate in a global marketplace.

An international business degree equips students with the skills to manage people, diversity in culture, and ways of conducting business in a diverse marketplace.

Level 8

Level 7

Career opportunities

An international business degree provides flexible career opportunities, allowing graduates to work with global companies or domestic firms involved in international trade. Typical roles include marketing, sales and customer service management, many progressing from local to global operations.

Double Degree

The BA (Hons) in International Business Double Degree partners with Hochschule Hannover, offering students a year abroad. To earn the double degree, students must complete credits at both universities and finish their final year at home.

	SE414 (Level 7)	COURSE DURATION L8: 4 YEARS L7: 3 YEARS		

About the course

Supply Chain is the management of any combination of processes, functions, activities, relationships, and pathways along which products, services, information, and financial transactions move in and between enterprises. It also involves any, and all, movement of these from original producer to the ultimate end-user or consumer. Doing all of the above in a sustainable and environmentally friendly way is now a key supply chain consideration.

Level 8

Level 7

Career opportunities

Graduates of this course will find career opportunities with many sectors in a variety of roles including: Supply Chain Manager; Operations Manager; Retail Manager, Distribution Manager; Procurement Manager; Logistics Manager and Consultancy.

Supply Chain is at the forefront of the Internet of Things and therefore presents many opportunities for those with an interest in technology.

About the course

Human Resource Management (HRM), is the function within an organisation that focuses on managing people. The objective is having the right people in the right place at the right time. The HRM function deals with recruiting and selecting employees, appraising their performance, deciding what rewards are appropriate, providing suitable training and development opportunities, and providing mechanisms for reducing and avoiding conflicts.

Managing people is challenging and the course assists with building a work environment where employees are more motivated.

Career opportunities

A business degree in HRM is internationally recognised and offers a passport for graduates to work globally. Careers in HRM include: generic HR management, specialist HR roles such as HR recruitment; training and learning coordinator; talent manager; HR leadership; organisational and change coordinator. Graduates may find employment in the private or public sector across all industries including: banking; education; retail and manufacturing.

About the course

Our Bachelor of Business (Honours) and Bachelor of Business courses equip students with a broad business skill-base, ensuring graduates will have a wide range of career options. The first two years of this course provide students with a foundation in business which allows students time to explore key subjects and future career choices open to graduates in the different specialism streams. After two years, students separate into one of the two streams of study.

Career opportunities

Graduates gain employment in financial services, including the funds sector, management roles in retail, marketing and administration as well as business computing. Graduates of the digital stream have specialised digital marketing skills.

About the course

The discipline of marketing is going through deep changes because of technology disruption. This change has borne new roles and areas of expertise collectively known as 'Digital Marketing'.

Organisations are adapting across the marketing lifecycle, in product conception to development, in advertising to selling and after-sales.

Career opportunities

Graduates of this course are suited to all areas of business and management that apply to graduates of our standard business degree.

Graduates with the digital marketing specialism have career opportunities in digital marketing, social media marketing, digital product management, online sales, online customer experience (CX), user experience (UX), digital advertising, search advertising and search engine optimisation.

	LEVEL 8	COURSE DURATION 3 YEARS		

About the course

Accounting is a vital part of any organisation's operations. Accountants provide essential information and advice to help a business make the right financial decisions.

Accounting careers typically involve analysing and utilising financial information to evaluate a business's financial position. This can involve anything from basic bookkeeping to managing income statements and statements of financial position.

Career opportunities

Graduates may take professional accountancy exams and qualify as a professional accountant. This course attracts generous exemptions from Chartered Accountants Ireland (CAI), the Association of Chartered Certified Accountants (ACCA), the Chartered Institute of Management Accountants (CIMA) and the Institute of Certified Public Accountants in Ireland (CPA). Accounting degree graduates are in high demand in accountancy firms, industry, financial services and the public sector. Graduates may also pursue a career in post-primary teaching following a period of further study.

About the course

The BA (Hons) in Accounting is a three year degree course that prepares students mainly for careers in accountancy, but can also provide graduates with opportunities in financial services and teaching.

The course attracts extensive exemptions from Chartered Accountants Ireland (ACA), the Association of Chartered Certified Accountants (ACCA) and the Chartered Institute of Management Accountants (CIMA).

Career opportunities

Graduates of the BA (Hons) in Accounting may work in business or as trainee accountants or teachers following further study.

To qualify as a professional accountant the graduate may opt to study for the accountancy examinations of one of the main accounting bodies while working in the accounting area.

PROGRAMME DIRECTOR
Dr Jennifer Hennessy
PhD
E: jennifer.hennessy@setu.ie

About the course

The BA (Honours) in International Business is a four year programme that prepares students to live and work in an international and multicultural environment.

The course provides a broad business education as well as building the knowledge, skills and sensitivities to work effectively in a multicultural world. The third year of the programme involves a mandatory International Placement.

Career opportunities

Graduates from this programme have gone on to pursue a wide

variety of careers, including careers in marketing, human resources, accounting, consulting, teaching, banking and finance.

Graduates are suited to the demands of both multinational, and small and medium-sized enterprises.

Double degree

The BA (Hons) in International Business has co-developed a Double Degree (Bachelor of Business Administration) with Munich UAS in Germany. A student may apply to complete the Double Degree while in second year of the course and would then spend their International Placement in Munich, before returning to complete their final year in SETU.

Business with Law

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE403	Round 1: 270	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Annette Holden CGMA E: annette.holden@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Historically, the disciplines of business and law have been closely associated. In the global economy, businesses deal with complex issues concerning government regulations and international trade policies.

Equally, the law has to contend with constantly evolving commercial organisations and business practices. With the expansion of the legal profession into areas of mergers and taxation, the skills of business and legal graduates have merged in many aspects.

Career opportunities

Graduates will be qualified to work as fully-trained legal executives or can also pursue careers in law, banking stockbroking, marketing, supply chain, finance, human resource management, journalism, property management, taxation, accounting and many other areas.

MBA
E: denis.obrien@setu.ie

About the course

This is a four year course and has three key content areas which include; coaching and player development, business and management of sport and sports science.

Classes are delivered in a range of settings including pitch, classroom and gym and will be of interest to those who are passionate about playing or coaching sport. Students have an opportunity to attain UEFA B Coaching certification in the third year of the course.

This course is delivered in association with the FAI and is only available at SETU.

Career opportunities

Graduates will be qualified to work in a variety of sports-related careers including: FAI Development Officer, FAI Administration, Sports Management, Club Development, Academy Football Coach, Fitness Instructor, Performance Analyst, Coach Education, Business Administrator, International Coaching Positions and Professional/Semi Professional Footballer.

Graduates have also taken up roles in business and marketing.

* Entry through a combination of leaving cert points, portfolio and interview.

Year 1 Modules

Semester 1

Player Development 1 - Football
Applied Anatomy & Sport Physiology 1
Intro to Coaching Pedagogy
Professional Writing & Research in the Digital Age
Information Technology 1
Foundations of Sport Management 1

Semester 2

Player Development (Football) 2
Applied Anatomy & Sport Physiology 2
Coach Education 1 - Football
Intro to Accounting for Sport
Foundations of Sport Management 2
Information Technology 2

Bachelor of Arts – Sport Coaching & Business Management (Football)

About the course

This course is delivered in association with the FAI and is only available at SETU.

The player development and football education modules are delivered by experienced coaches and coach educators from the FAI giving students an opportunity to attain UEFA B Coaching certification in the third year of the course.

This course is suitable for anyone who has an interest in soccer, both playing and coaching or in the business and administration side of sport.

Career opportunities

Graduates will be qualified to work in a variety of sports-related careers including: FAI Development Officer, FAI Administration, Sports Management, Club Development, Academy Football Coach, Fitness Instructor, Performance Analyst, Coach Education, Business Administrator, International Coaching Positions and Professional/Semi Professional Footballer.

Graduates of this course may be eligible to progress to Year 4 of the BA (Honours) Sports Management and Coaching (Football) - SE909.

* Entry through a combination of leaving cert points, portfolio and interview.

--	--	---	---

About the course

Exercise Sciences (Common Entry) is a four year degree path for those wishing to pursue a programme of study in the area of exercise science but who also wish to graduate in a specialist field. It is for students interested in Exercise Sciences as a broad career, but who are initially unsure about their specific areas of interest or career plan.

Career opportunities

Career opportunities will be subject to your choice of specialist exit pathways. Exercise Sciences (Common Entry) has three specialist exit pathways - Sport, Nutrition or Health. Towards the end of your second year of the common entry degree programme you will be asked to select one of them to study in order to obtain your final award.

Year 1 Modules

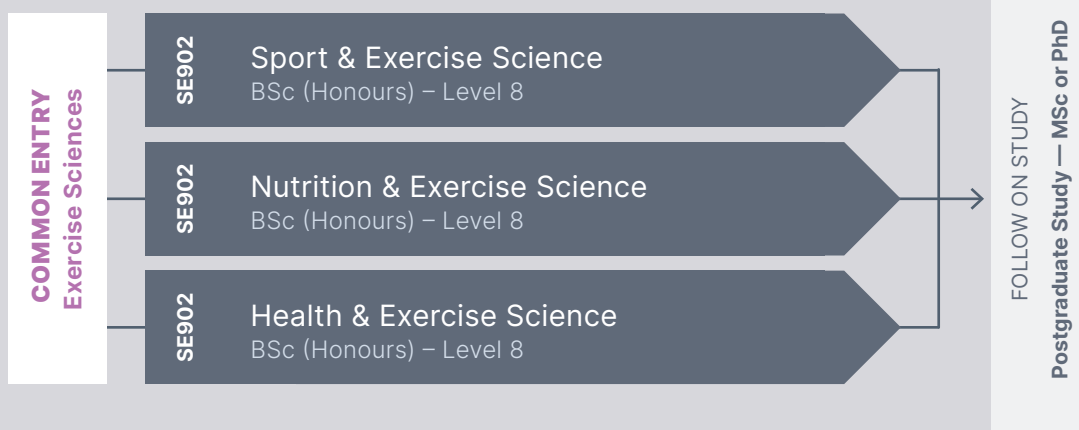

Semester 1

- Fitness & Movement
- Functional Anatomy & Kinesiology
- Promoting Physical Activity Research & Learning
- Intro to Sport Psychology
- Human Physiology

Semester 2

- Sport & Exercise Biomechanics 1
- Intro to Exercise Psychology
- Biomolecules & Cells
- Strength & Conditioning
- Data & Measurement
- Business for the Exercise Professional

Exercise Sciences — COMMON ENTRY Degree Options

COMMON ENTRY — Bachelor of Science (Honours) Sport & Exercise Science

LOCATION	COURSE CODE	CAO POINTS 2024	COMMON ENTRY ROUTE	STREAM LEAD
Waterford	SE902	Round 1: 279		SE902 Exercise Sciences (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Sport and Exercise Science programme will give graduates the knowledge and skills to evaluate and improve sport and athletic performance.

The programme will emphasise the traditional sports science disciplines of biomechanics, physiology and psychology but also newer applied sports science disciplines including strength and conditioning, sports nutrition and performance analysis.

Career opportunities

Students will be capable of working with athletes and coaches on an ongoing basis to improve performance, health and well-being.

Students may also undertake post graduate study through either taught Masters programmes or research degrees at Masters and Doctoral level, ultimately providing sport science support, entering industry or remaining in research and education.

Year 3 Modules

Semester 1

Advanced Performance Analysis
Applied Sport and Exercise Physiology
Conditioning for Performance Sport
Contemporary Issues in Sport and Exercise
Sport & Exercise Biomechanics 2
Sport & Exercise Nutrition

Semester 2

Applied Biomechanics
Exercise Psychology in Practice
Major Project in Sport and Exercise Science 1
Science of Elite Sport Performance
Sports Medicine

COMMON ENTRY — Bachelor of Science (Honours) Nutrition & Exercise Science

LOCATION	COURSE CODE	CAO POINTS 2024	COMMON ENTRY ROUTE	STREAM LEAD
Waterford	SE902	Round 1: 279		SE902 Exercise Sciences (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Nutrition and Exercise Science degree gives graduates the knowledge and skills to work with individual athletes and teams to optimise nutrient intake, performance and health.

Graduates possess the capability to provide good nutritional advice to the general population, assisting health and weight, through a degree focused on both nutrition and exercise, including a nutrition placement.

Career opportunities

Graduates may continue further studies to register as a registered Sport and Exercise Nutritionist (SENR) who provide sports nutrition advice to high class athletes.

Graduates may also continue to pursue work/study in a health related area of nutrition. Careers as nutritionists, nutritionist in food companies, working in the supplements industry, health food industry to name a few.

Year 3 Modules

Semester 1

Applied Sport and Exercise Physiology
Assessment for Nutritional Status
Pathophysiology of Disease
Sport and Exercise Nutrition
Weight Management

Semester 2

Applied Sports Nutrition
Food Technology and Safety
Major Project in Nutrition and Exercise Science 1
Nutrition for the Life Cycle
Professional Practice & Social Media
Exercise Psychology in Practice
Exercise as Medicine 1

STREAM LEAD
Dr Barry Lambe
PhD
E: barry.lambe@setu.ie

About the course

The Health and Exercise Science programme will give graduates the knowledge and skills needed to assist distinct population groups and those with health problems to engage in physical activity and structured exercise programmes.

The programme includes traditional exercise science disciplines such as physiology, biomechanics and psychology but also newer applied areas such as nutrition, physical activity, strength and conditioning, exercise programming and exercise as medicine.

Career opportunities

Graduates will be accredited Exercise for Health Specialists which allows them to work with new or existing exercisers at risk of or with chronic health conditions.

Graduates are currently employed as adapted physical activity specialists, sports development officers, physical activity promotion officers, health and exercise specialists and personal trainers.

Year 3 Modules

Semester 1

Applied Sport and Exercise Physiology
Active Aging
Pathophysiology of Disease
Physical Activity Assessment & Evaluation
Weight Management

PROGRAMME DIRECTOR
Dr Jean McArdle, PhD
E: jean.mcardle@setu.ie
Dr Emma Saunders, PhD
E: emma.saunders@setu.ie

About the course

The BSc (Hons) in Sports Coaching and Performance is a four year honours degree that provides aspiring coaches from a variety of sporting backgrounds with an advanced coach education.

The programme combines the disciplines of sport science and coach education, applying theory to practice in different performance environments.

An internship year provides students with a unique lived experience to work in the field and gain knowledge in the working environment.

Career opportunities

Four key areas of employment range from:

- Coaching and sports development
- Performance Analyst
- Strength and conditioning coach
- Applied sport scientist.

Students will also have the knowledge and skills necessary to undertake advanced coaching awards to international standards in their specialist sports in the years following graduation.

Year 1 Modules

Semester 1

Intro to Coaching
Intro to Sport & Exercise Science
Intro to Sports Coaching & Society
Lifestyle Management
Research & Learning
Strength & Conditioning 1

Semester 2

Coach Education
Talent Identification & LTAD
Motor Behaviour
Data & Measurement
Exercise Physiology 1
Sports, Biomechanics & Kinesiology

Bachelor of Science (Honours) Sport Rehabilitation & Athletic Therapy

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE901	Round 1: 473	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7 Garda vetting required	Dr Sharon Kinsella PhD E: sharon.kinsella@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This course equips students with the skills to manage the assessment, treatment and rehabilitation of injured individuals by offering a unique blend of academic theory, practical workshops and clinical placements. Students on this course enjoy state of the art facilities with an elite gym and a fully equipped dedicated sports injury clinic.

Career opportunities

Graduates will be expert practitioners in injury assessment, treatment and rehabilitation, with knowledge and skills extending to sports nutrition, strength and conditioning, and

exercise prescription.

Employment opportunities include:

- Establishing your own Athletic Therapy clinic as an independent practitioner
- Becoming employed within established Athletic Therapy or Physiotherapy clinics amateur to elite levels
- Working with individual athletes
- Take up a broad array of health and physical activity roles.

This programme is accredited by Athletic Rehabilitation Therapy Ireland (ARTI) and following graduation students can apply to become Certified Athletic Therapists.

	LEVEL 6	COURSE DURATION 2 YEARS		

About the course

Physiology and Health Science is the study of the human body with specific focus on how the body functions in relation to health and exercise.

This course provides formative level understanding of core physiology and health science subjects, combining theory with 'hands-on' practical elements resulting in an exciting and rewarding course.

Career opportunities

This course provides graduates with an avenue to progress to degree level courses in the allied health professions. Most graduates progress to further study in physiotherapy, occupational therapy, sport rehabilitation, radiography, nutrition and dietetics, speech and language therapy, chiropractic medicine and osteopathic medicine. The course provides a direct entry point to Year 3 of the BSc (Honours) Sport Rehabilitation and Athletic Therapy.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Strength and Conditioning is an applied science that focuses on improving athletic performance, specifically endurance, speed, strength and power.

This course is designed to help students develop the knowledge, skills and analytical techniques in the sub-disciplines of sport and exercise sciences.

Students gain the knowledge and skill to help athletes and players achieve optimum sports performance.

Career opportunities

Graduates of our strength and conditioning degree course will be able to use scientific knowledge and practical expertise to guide the design and implementation of training programmes and monitoring of athletes.

Graduates will also have expert knowledge in the application of strength and conditioning for both children and older adults.

Year 1 Modules (Common to SE903 and SE905)

Semester 1

Anatomy of Human Movement 1
Physiology & Cell Biology 1
Strength & Conditioning: Applied Coaching 1
Maths & Physical Sciences for Health Science
Intro to Sports & Exercise Psychology

Semester 2

Anatomy of Human Movement 2
Physiology & Cell Biology 2
Strength & Conditioning: Applied Coaching 2

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This Sport & Exercise Sciences course allows students develop the knowledge and skillset essential for improving health related outcomes in the general population, and to enhance performance across all levels of sport. The foundation of this degree is in the physical sciences which feature alongside essential modules in anatomy, exercise physiology, nutrition, biomechanics, coaching, sport psychology and health promotion. All modules are delivered by passionate academic staff many of whom are experienced practitioners and researchers in high-

performance sport. Students develop core and transferable skills throughout this course allowing them to pursue a variety of career and postgraduate opportunities.

Career opportunities

- High Performance Sport
- Sports Technology
- Physiotherapy
- Medicine
- Pharmaceuticals Industry
- Data analytics
- Clinical measurement science
- Sport Development
- Health Promotion

Year 2 Modules (Common to SE905 and SE903)

Semester 1

Pathophysiology
Health Psychology and Promotion 1
Motor Control
Nutritional Biochemistry
Research in Sport and Health

Semester 2

Exercise Physiology 2 for Sport
Health Psychology and Promotion 2

Strength and Conditioning Applied Coaching 3

NURSING, HEALTH & PSYCHOLOGY

Bachelor of Science (Honours) General Nursing

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE915	Round 1: 418	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7 Science: O6/H7	Dr Catherine Madden EdD E: catherine.madden@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Bachelor of Science (Honours) in General Nursing is a four year professional degree course that qualifies you as a Registered General Nurse and enables you to register with the Nursing and Midwifery Board of Ireland.

This innovative programme will help you to become a highly skilled and competent nurse, preparing you for a rewarding career in the nursing profession.

Career opportunities

Upon graduation, you will be qualified to work as a nurse in Ireland and abroad. You will be able to work in a variety of roles in both acute and community health care settings, including hospitals, nursing homes, general practice, occupational health, and more.

Career opportunities and pathways exist in clinical practice, management, education and research.

Year 1 Modules

Semester 1

General Nursing Skills & Experience
Intro to General Nursing Learning to Learn
Personal & Professional Development
Professional & Patient Safety 1
Anatomy & Physiology 1

Semester 2

Fundamentals of General Nursing
Health & Psychosocial Studies
Intro to Evidence Based Practice 1
Medication Management 1
Anatomy & Physiology 2
Nursing Experience 2

Bachelor of Science (Honours) Psychiatric Nursing

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE914	Round 1: 330	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7 Science: O6/H7	Miriam Farrell E: miriam.farrell@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Bachelor of Science (Honours) in Psychiatric Nursing is a 4 year professional honours degree course that qualifies you as a Registered Psychiatric Nurse (RPN) and enables you to register with the Nursing and Midwifery Board of Ireland (NMBI). Psychiatric Nursing / Mental Health nursing is a specialist field that involves the use of therapeutic interpersonal skills and interventions to deliver person centred, holistic care for people who use the mental health services both in acute and community settings to support, empower and enable the person to recover from their distress.

The role involves engaging, liaising, and working alongside with other professionals, agencies, the person who uses the services and their families to develop individualised, recovery focused plans for their care, management and treatment.

Career opportunities

- Acute & community care settings in Ireland and internationally
- Early Intervention services
- Early Intervention services
- Dual diagnosis services
- Addictions services
- Child and adolescent services
- Psychiatry of later life services
- Clinical practice, management, education and research.

Year 1 Modules

Semester 1

Anatomy & Physiology
Fundamental Nursing Skills & Psychiatric Nursing Experience (placement)
Intro to Psychiatric Nursing Learning to Learn
Personal & Professional Development
Professional & Patient Safety

Semester 2

Altered Mood Perspective
Anatomy & Physiology 2
Health & Psycho Social Studies
Intro to Evidence Based Practice
Medication Management
Psychiatric Nursing Experience

Bachelor of Science (Honours) Intellectual Disability Nursing

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE916	Round 1: 308	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7 Science: O6/H7	Ms Lorraine Dillon E: lorraine.dillon@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Intellectual disability nursing is a speciality field of nursing providing person-centered and holistic care and support to people with intellectual disabilities across the lifespan.

Intellectual disability nurses work as part of transdisciplinary teams to enable and empower people with intellectual disabilities to reach their full potential.

Career opportunities

Graduates may apply for staff nurse posts within intellectual disability services. Internationally, Irish nurses are highly regarded thus enhancing career opportunities.

Following qualification you can specialise within intellectual disability nursing in areas such as communication, behaviour support and dementia.

You may also pursue postgraduate study in nurse education/management.

Year 1 Modules

Semester 1

Anatomy & Physiology 1
Intellectual Disability Nursing Skills & Experience
Intro to Intellectual Disability Nursing
Learning to Learn
Personal & Professional Development
Professional & Personal Safety 1

Semester 2

Anatomy & Physiology 2
Caring for People with Intellectual Disabilities
Health & Psychosocial Studies 1
Medication Management 1
Intro to Evidence Based Practice
Nursing Experience 2

About the course

Healthcare and health promotion are broad fields with diverse areas of work where health science graduates can make a difference to people's lives. There are many career options across a wide range of health-related industries, ranging from direct individualised care to people across the lifespan from infancy to old age and persons with special needs, or through telehealth careers, to management & research.

Career opportunities

Career opportunities will be subject to your choice of specialist exit pathways. Health Sciences (Common Entry) is the gateway for the two Level 8 BSc (Honours) degrees in SETU, an Applied Health Care degree or a Public Health and Health Promotion degree. At the end of first year you will be asked to select one of the courses to study in order to obtain your final award.

About the course

The BSc (Honours) in Applied Health Care is a full-time, four year, honours degree course that can be chosen within the Health Sciences Common Entry Route.

This honours degree course allows the student to develop as a self-aware, reflective graduate who is a confident practitioner and able to integrate and use their knowledge, skills and attitudes in a variety of health care settings.

Career opportunities

Graduates may gain employment in the following areas:

- Technical health care roles
- Phlebotomy
- Managing and coordinating General Practices.
- Delivery of health care in the emerging telehealth industry
- Health research
- Applied health care provision in a variety of healthcare settings
- Healthcare education
- Postgraduate study.

	LEVEL 8	COURSE DURATION 3 YEARS		

About the course

Psychology is the scientific study of cognitions, the mind, and behaviour, and help us better understand our world.

The BA (Hons) in Psychology at SETU is a three year, full-time honours degree.

The programme emphasises critical thinking and research skills, through modules which examine both the theory and application of psychological knowledge.

Career opportunities

Graduates may choose to study at postgraduate level in order to seek a career as a professional psychologist in areas such as: clinical, educational, coaching, counselling, forensic, health, academia, neuropsychology, work/organisational, or sport.

Alternatively, many psychology graduates find rewarding careers in a related profession such as healthcare, human resources, marketing.

This course is accredited by the Psychological Society of Ireland.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This is a studio-based technical design course that integrates architectural theory with practical application. Students complete an integrated project, based on a field study to international locations such as Bilbao, Rome or Milan.

Students will complete a 30-credit work placement during Semester 5 in Year 3 providing great insight into their role.

Career opportunities

With the increasing complexities of construction, Architectural

Technologists have never been so much in demand. Careers can include working with

other technologists and architects on building design and construction, BIM management, modular building specialization, technical sales, education, environmental design and many other creative and technical roles.

As a graduate, you will have numerous options for further study, both within SETU and beyond. Options range from Masters by research into a topic that really interests you, taught Masters in specialist areas such as Project Management, Conservation to specialist environmental qualifications such as LEED Professional and also BIM management.

This course is professionally accredited by both CIAT and the RIAI.

Career opportunities

With the increasing complexities of construction, Architectural Technologists have never been so much in demand. Careers can include working with other technologists and architects on building design and construction, BIM management, modular building specialization, technical sales, education, environmental design and many other creative and technical roles.

As a graduate, you will have numerous options for further study, both within SETU and beyond. You will have the opportunity to continue into the final year of the BSc Honours Architectural Technology programme and from there further studies at Masters level.

Year 1 Modules

Semester 1

Studio 1
Building Technology, Materials & Structures 1
Revit, CAD & Information Technology 1
Building Performance & Services 1
Surveying & Recording 1

Semester 2

Studio 1 (continued)
Building Technology, Materials & Structures 2
Revit, CAD & Information Technology 2
Building Performance & Services 2
Surveying & Recording 2

Bachelor of Science Architectural Technology

Waterford - Granary	SE716	Round 1: 234	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Gordon Chisholm MCIAT E: gordon.chisholm@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

This three year course enables students to become competent in preparing construction drawings and specifications for complex building types. Architectural Technologists become specialists in preparing detailed drawings and specifications for building projects. They work closely with architects and other members of the design team.

Career opportunities

Graduates are in very high demand, particularly in architectural design offices at home and abroad. The knowledge and skill sets gained on this degree programme are directly relevant modern design and construction. Many graduates progress to the Level 8 degree, either immediately or after gaining some work experience.

Year 1 Modules

Semester 1

- Arch & BIM Technology Studio 1
- Arch Communications & BIM 1
- Construction Technology 1
- Detail the External Envelope
- Structures & Environment 1

Semester 2

- Arch & BIM Technology Studio 2
- Arch Communications & BIM 2
- Construction Technology 2
- Creative & Critical Thinking
- Structures & Environment 2

BUILT ENVIRONMENT

Bachelor of Science (Honours) Construction Management & Engineering

Waterford	SE707	Round 1: 263	2 subjects: H5 4 subjects: O6/H7 English or Irish: O5/H7 Mathematics: O5/H7	Dr Brian Graham PhD E: brian.graham@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Construction Management and Engineering prepares students for responsible engineering and management roles in all phases of construction projects. It emphasises management, engineering and technological techniques useful in organising, planning and controlling the activities of diverse specialists working in the project environment of the Irish and international construction industry.

Career opportunities

The CME programme prepares students for a variety of exciting career opportunities in project management and engineering roles across the global construction sector. Many of our graduates work with some of the best Irish and international construction companies in roles such as: Project Management, Construction Engineering, Design and Build, IT, Facilities Management, Business, and many more.

Year 1 Modules

Semester 1

Construction Measurement & Estimating 1
Intro to Management Mathematics
Residential Technology 1
Intro to ICT
Communications & Study Skills

Semester 2

Intro to Construction Economics
Theory of Structure
Intro to Construction Materials
Intro to BIM
Intro to Building Services
Residential Technology 2

Bachelor of Science (Honours) Construction Management

Carlow	SE706	Round 1: 298	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Anthony Dempsey MSC E: anthony.dempsey@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Construction projects supply the key infrastructure that is vital for modern society ranging from schools to hospitals, houses, apartment buildings, office blocks, shops and retail buildings.

Construction managers are responsible for managing the construction of these projects from concept to completion, ensuring that they meet the client's requirements and are completed on time and within budget.

Career opportunities

- Manage the construction process with building contractors
- Project manager working with project management consultants
- Manager of property procurement process working with property developers
- Manager of new developments for large retail and industrial companies with internal building procurement offices.

Year 1 Modules

Semester 1

Domestic Technology & Structural Appreciation 1
Land Surveying
AutoCAD, IT & Communications
Applied Mathematics
Intro to the Construction Industry

Semester 2

Domestic Technology & Structural Appreciation 2
Materials, Building & Land Surveying
Building Services 1
Building Information Modeling 1
Construction Management Fundamentals

PROGRAMME DIRECTOR
Shane Murray
MSc
E: shane.murray@setu.ie

About the course

This course covers the core civil engineering disciplines of highways, structures, geotechnics, water and environmental. You will learn how to design and construct a wide variety of civil engineering projects from motorways to buildings, bridges, water & wastewater schemes and environmental projects. You will learn about the importance of developing sustainable solutions and develop the analytical skills and structured approach to problem solving that underlies civil engineering. This

course is accredited by Engineers Ireland as a Level 8 honours degree.

Career opportunities

Studying on this course will give you the skills to work as a Civil Engineer and play an important role in the design, construction and maintenance of vital civil engineering projects. These provide the vital infrastructure which is critical for modern living.

Our graduates work on major civil engineering projects for Design consultants, contractors, local authorities and utility companies such as Irish Water and the ESB. A civil engineering qualification travels well - allowing graduates to work anywhere in the world.

The employment prospects for Civil Engineers are excellent with demand exceeding supply.

Year 1 Modules

PROGRAMME DIRECTOR
Brian Byrne
MSc Eng
E: brian.byrne@setu.ie

About the course

This course develops the core skills that you will need as a Civil Engineering Technologist. You will learn the methods used in the design and construction of roads, buildings, bridges, water and sewage treatment plants. You will study the properties of the key materials including concrete, soils and stone aggregates. You will develop your CAD skills to create 2D and 3D drawings. You will learn to survey using our state-of-the-art equipment which includes levels,

Total Stations and GPS equipment.

The course is accredited by Engineers Ireland.

Career opportunities

Our graduates work with contractors, consultants or local authorities on civil engineering design, construction and maintenance works. You have the opportunity to contribute to the vital infrastructure that a modern country requires. A civil engineering qualification travels well - allowing graduates to work anywhere in the world. You may be able to transfer to our Level 8 Civil Engineering Hons Degree and qualify as a civil engineer if you achieve the required results in Year 3 of this course.

The demand for Civil Engineering Technologists greatly exceeds supply at present.

Waterford	SE704	Round 1: 280	2 subjects: H5 4 subjects: O6/H7 English or Irish: O5/H7 Mathematics: O5/H7	John Mernagh MRICS, MSCSI E: john.mernagh@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Quantity Surveying in SETU is an internationally recognised Honours Degree programme. It boasts a 100% graduate employment record for each of the last 10 academic years placing our graduates amongst the most highly sought after in the industry.

It has full course accreditation from the Society of Chartered Surveyors Ireland. It provides the student with 30 weeks paid placement with tier 1 main contractor and consultancy firms in Ireland, Europe and North America in year 3 of the programme.

Career opportunities

Graduates are currently working all over the world on some of the largest construction projects around the globe.

Our graduates can expect a career as a high valued and integral member of the design team on construction projects of all sectors and values both nationally and internationally.

The cost skills of cost management, contractual knowledge, negotiation and communication skills are an integral part of the course we offer in SETU.

Graduates will be permitted direct entrance to the Assessment of Professional Competence.

Year 1 Modules

Semester 1

Intro to Management
Measurement & Estimating 1
Mathematics for Surveyors
Residential Technology 1
Communication & Study Skills
Intro to ICT

Semester 2

Intro to Construction Economics

Carlow	SE705	Round 1: 307	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Fiona Dawson MBS, FSCSI, FRICS E: fiona.dawson@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Quantity surveyors oversee all aspects of construction costs, ensuring projects are completed on time and within budget. Our course develops essential skills, focusing on construction methods and technology, from housing to complex commercial developments. With a "ground-up" approach, students gain a comprehensive understanding of construction, become commercially aware, and benefit from an SCSI-accredited program that includes a full semester of work placement in the third year.

Career opportunities

Quantity surveyors can find employment with consultancy firms, general and specialist building contractors, local authorities and government departments.

Graduates will be qualified to:

- Manage building design costs
- Manage contract and procurement procedures
- Administer financial construction contracts and budgets
- Manage projects.

The current demand for quantity surveyors far exceeds the supply.

Year 1 Modules

Semester 1

Land Surveying
AutoCad, IT & Communications

Bachelor of Science (Honours) Set Design & Construction

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE734	Round 1: 291	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Ms Yvonne Finn PGDip E: yvonne.finn@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The creative industries of film and TV production, theatre, and events management are areas of considerable growth.

This new degree is aimed at applicants who would like to work as part of the team who design and build film, theatre and TV sets.

The fourth year also allows for a deeper exploration of new technologies in set design and construction by examining the world of virtual production.

Career opportunities

- TV/Film/Theatre Art Director
- TV/Film/Theatre Set Designer and art department crew
- Production and/or construction coordinator
- Theatre and events crew member
- Advertising and social media creative
- Event prop maker
- Event management
- Virtual world production.

ENGINEERING

Bachelor of Engineering (Honours) Aerospace Engineering

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE714	Round 1: 440	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Gerard Gibbs PhD E: gerard.gibbs@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Aerospace engineering covers the design and development of all types of aircraft including: airplanes, helicopters, satellites and spacecraft.

Aerospace engineers bring concepts to reality by applying the principles of engineering to the design, manufacture and operation of highly-sophisticated technologies for use in aviation and space exploration.

Career opportunities

Aerospace engineers work in many different aspects of the aerospace industry which can involve air vehicle design, engineering analysis, flight testing and development of avionic systems.

Year 1 Modules

Semester 1

Engineering Mathematics 1
Aircraft Anatomy & Design 1
Aviation Science 1
Avionics Fundamentals 1
Management Fundamentals & Communications

Semester 2

Engineering Mathematics 2
Aircraft Anatomy & Design 2
Aviation Science 2

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

Aircraft systems engineering is the field of study relating to the maintenance and airworthiness of aircraft. Aircraft system engineers work in the development of on board systems, including flight controls, landing gear, electrical power systems, hydraulics, and avionics systems.

Career opportunities

Aircraft system engineers work with airline and aircraft maintenance companies. The role of an aircraft systems engineer can involve maintenance scheduling, logistics and field support.

Year 1 Modules

Semester 1

SE700	Automation Engineering Sustainable Energy Engineering Sustainable Civil Engineering Electronic Engineering Electrical Engineering	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O2/H6	Mr David Williams E: david.williams@setu.ie

About the course

The common engineering honours entry scheme is for students interested in engineering as a career, but who may be unsure of which discipline to follow. Year 1 gives students the opportunity to explore the five Bachelor of Engineering (Honours) degree options and decide which is best for them: Automation, Electrical, Electronic, Sustainable Civil and Sustainable Energy.

Career opportunities

There are many types of Engineering all of which are focused on making a better world. Studying Engineering leads to exciting career options at home and abroad with top salaries across a wide range of industries. Engineers are shaping the future by applying their valuable knowledge and skills. They are central to innovation and new product development.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Modern automation engineering combines elements of software programming, networking, databases, data intelligence, robotics, interfacing, instrumentation and electronics which are highly sought-after skills in sectors such as the pharmaceutical, medical device and food industries.

Career opportunities

Graduates for the BEng (Honours) in Automation Engineering may find employment in the following areas:

- Automation Engineering
- Control Engineering
- Research & Development
- Test & Measurement
- Data Intelligence
- Network Management
- Production Support.

Year 2 Modules

Semester 1

Instrumentation & Measurement
Electromechanical Devices & Interface

Waterford	SE700	Round 1: 272	SE700 (Level 8) Engineering (Common Entry)	Colm Tynan MEng E: colm.tynan@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This programme investigates energy and its uses in areas such as sustainable low energy building design, low and zero carbon heat and power generation technologies (including renewables), energy management, energy storage and carbon emissions.

Become an engineer who designs energy systems, optimise energy performance, understands alternative energy technologies and environmental impact.

Career opportunities

Graduates from the BEng (Honours) in Sustainable Energy Engineering will be equipped with the knowledge and skills required to pursue a career within the energy sector either in Ireland or abroad. No two days as an energy engineer are the same. Graduates may find employment in the following areas:

- Design Energy Engineer
 - Energy Manager
 - Specialist Low Energy Design Consultant
 - Site Engineer
- and much more!

Year 2 Modules

Semester 1

BIM 2 – Mechanical Services Design 1
Engineering Maths 3
Heat Transfers in Buildings
Mechanical Building Services
Sustainable Heat & Power Generation
Engineering Finance

Semester 2

BIM 3 – Mechanical Services Design 2
Thermodynamics

Materials for Sustainable Design
Introduction to Project Management

COMMON ENTRY — Bachelor of Engineering (Honours) Sustainable Civil Engineering

LOCATION	COURSE CODE	CAO POINTS 2024	COMMON ENTRY ROUTE	STREAM LEAD
Waterford	SE700	Round 1: 272		SE700 (Level 8) Engineering (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Civil Engineers work to achieve safe and sustainable development in a cost-effective, environmentally protective and socially responsible manner.

They utilise engineering principles to enhance the built and natural environment, and contribute to environmental protection and remediation, water conservation, environmental biotechnology, materials and infrastructure development.

Career opportunities

This course was established in 2010 and is very well regarded by industry, both in Ireland and internationally.

Having a civil engineering qualification that has sustainability as its core theme enables graduates to undertake a variety of design and construction roles in the future civil engineering industry.

Year 2 Modules

Semester 1

Construction Health & Safety
Construction Technology
Built Environment Engineering
Math 1
Reinforced Concrete Design
Site Works Design
BIM 2 and Surveying

Semester 2

Built Environment Engineering

Waterford	SE700	Round 1: 272		SE700 (Level 8) Engineering (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The BEng (Honours) in Electronic Engineering is a full-time, four year, honours degree course that can be chosen within the Engineering Common Entry Route.

This course is recognised by Engineers Ireland (EI) and prepares students for employment in the electronics industry.

Career opportunities

Graduates of BEng (Honours) in Electronic Engineering may find employment in the following areas:

- Electronics Design
- Control Engineering
- Research & Development
- Test & Measurement
- Technical Support
- Electronic Sales.

Year 2 Modules

Semester 1

Advanced Programming for
Robotics
Analogue Electronic Circuits 1
Finite State Machines

About the course

Electrical Engineering is concerned with the generation, transmission and distribution of Electrical power, the design and development of electrical machines and equipment and the specification of electrical service plans for industrial buildings and facilities.

Electrical Engineers work on the development of a smart electrical grid to allow for the effective use of renewable energies.

Career opportunities

Graduates from the BEng in Electrical Engineering may find employment in fields such as:

- Pharmaceutical Industry
- Medical Technology
- Manufacturing Engineering
- Power Generation
- Renewable Energies
- Electrical Contracting

Filling roles such as:

- Electrical Technician
- Maintenance Technician
- Field Service Engineer
- Electrical Services Engineer.

About the course

Electronics are at the heart of everyday life. Mobile and medical devices, vehicles, renewable energy systems and robots are now ubiquitous. As these technologies evolve, electronic engineers are at the forefront of this technological revolution. Electronic engineers work on cutting-edge research and development (R&D), semi-conductor fabrication, design, prototyping and software development. The course is a blend of theory, practical classes and hands-on project-based learning.

Career opportunities

Electronic engineers have a wealth of career prospects to choose from.

Ireland is home to most of the multinational technology and biomedical giants, such as Intel, Analog Devices, Apple, Boston Scientific, Medtronic, Google, Facebook, to name but a few.

Graduates can pursue careers in research and development, design, development, implementation and integration, software, sales and more.

About the course

Electronic Engineering is concerned with the design, development, manufacture and application of electronic devices, circuits and systems. Embedded Software is now common place in modern electronics. This programme is structured to enable a student to:

- develop solid technical skills in electronic hardware and software for employment and/or further education purposes
- have an understanding of and commitment to professional & ethical engineering practice towards people, society and the environment.

Follow-on SETU undergraduate programmes are available at Level 7 and Level 8.

Career opportunities

Graduates of the Higher Certificate in Engineering in Electronic Engineering find work in the following areas:

- Assembly, testing and troubleshooting of electronic equipment
- Operation and servicing of electronic equipment
- Technical sales and technical support
- Hardware and software applications.

Carlow	SE709	Round 1: 288	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Christopher Kufazvinei PhD E: chris.kufazvinei@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Biomedical electronics involves the application of electronic circuits and technologies for treating medical conditions, monitoring health problems and improving quality of life for patients.

Examples include:

- Medical implants (cardiac defibrillators, pacemakers, deep brain neuro-stimulators, insulin pumps)
- Medical monitors (ECG, EEG)
- Diagnostic equipment (ultrasound, MRI, PET, CT, X-ray)

- Life support (ventilators, incubators);
- Surgical equipment (endoscopy and electrosurgical).

Career opportunities

MedTech Sector:

- Research and development (R&D)
- Design of electronic circuits and systems for medical technologies
- Advanced manufacturing processes
- Specialist rehabilitation engineering
- Wearable and connected health products
- Clinical medicine & pharmaceutical products
- Engineering consultancy on biomedical technologies.

Year 1 Modules

Semester 1

Mathematics & Computer Applications 1
Electrical & Electronic Fundamentals
Programming Systems
Physiology & Cell Biology 1

Semester 2

Mathematics & Computer Applications 2
Electrical & Electronic Circuits
Technical Communications
Prototyping

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

Biomedical electronics involves the application of electronic circuits and technologies for treating medical conditions and monitoring health problems for patients.

Examples include:

- Medical implants (cardiac defibrillators, pacemakers, deep brain neuro-stimulators, insulin pumps)
- Medical monitors (ECG, EEG)
- Diagnostic equipment (ultrasound, MRI, PET, CT, X-ray)

- Life support (ventilators, incubators);
- Surgical equipment (endoscopy and electrosurgical).

Career opportunities

MedTech Sector:

- Research and development (R&D),

Bachelor of Engineering (Honours) Robotics & Automated Systems

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE710	Round 1: 308	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Dorel Picovici PhD E: dorel.picovici@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Robotics and automated systems is a multidisciplinary area that combines electronic engineering, mechanical engineering, and computer science.

Students learn about industrial and collaborative robots, automation, embedded programming, control systems, automated decision-making and power electronics, which find application in almost every industry such as pharmaceutical, automotive, healthcare and agriculture.

Career opportunities

- Robotics Engineers / Test Engineers
- Automation System Engineers
- Senior Automation Engineer
- Senior Controls Engineer
- Senior C++ Engineer – R&D role
- Process Excellence Analyst
- Controls Team Lead
- Robotics Process Automation (RPA) Consultant
- Maintenance Test Engineer
- Field Service Engineer
- Solutions Architect Consultant (Very senior role)
- Engineering Project Manager.

About the course

Robotics and automated systems is a multidisciplinary area that combines electronic engineering, mechanical engineering, and computer science.

Students learn about industrial and collaborative robots, automation, embedded programming, control systems, automated decision-making and power electronics, which are used in a range of applications e.g. packaging, welding, painting, machining and inspecting parts across all industry sectors.

Career opportunities

- Robotics Engineers / Test Engineers
- Automation System Engineers
- Senior Automation Engineer
- Senior Controls Engineer
- Senior C++ Engineer – R&D role
- Process Excellence Analyst
- Controls Team Lead
- Robotics Process Automation (RPA) Consultant

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE711	Round 1: 433	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Joe Dillane MA E: joe.dillane@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Mechanical engineering is one of the most diverse of the engineering disciplines. It deals with the design and manufacture of everything, from small individual parts and devices to large systems.

A mechanical engineer takes ideas from concept to reality. It requires specialist engineering knowledge combined with creative thinking, problem solving, team working and analytical skills.

The course equips graduates with specialist skills required to manage complete mechanical engineering

processes - from design through to output.

Career opportunities

Mechanical engineers work in a diverse range of industries including: automotive; aerospace; biotechnology; computers and electronics; microelectromechanical systems; energy conversion; environmental control; automation and manufacturing.

Graduates will have a variety of career options open to them such as working in industry, government, consultancy or research centres.

Mechanical & Manufacturing Engineering

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE712	Round 1: 264	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O3/H7 *Subjects compensation	Dr Jim Lawlor PhD E: jim.lawlor@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This is a broad area focusing on the design and development of products and processes.

Mechanical engineering has a strong product and equipment design element, while manufacturing engineering analyses the processes and systems required to produce goods.

Streams include: biomedical engineering, automation and additive manufacturing.

* H5 or better in Lab Science or technical subject compensates for not making the required maths grade.

Career opportunities

Graduates of the course may find work in the following areas:

- Process Design and Improvement
- Enterprise Resource & Facilities Management
- Product Design & Development
- Manufacturing Engineering
- Research & Development
- Quality Management

Past graduates are with international industry including Bausch & Lomb, Boston Scientific, Sanofi, Intel, Stryker, De Puy and Radley Engineering.

About the course

There is an unprecedented demand for Mechanical Engineering Degree Graduates locally, nationally and internationally. Mechanical engineering is the branch of engineering that deals with the design and manufacture of machinery and tools. Mechanical engineers use applied maths and science to design a wide range of machines, from domestic household appliances to sophisticated machines such as aircraft and automobiles.

To reflect the practical nature of mechanical engineering, the course contains a number of laboratory classes. These include

Workshop, Automation, Materials, Science and Automotive laboratories. In addition, industrial visits and field trips are used to enhance the learning experience.

Career opportunities

Graduates of BEng in Mechanical Engineering have found employment in such areas as:

- Engineering support roles in Manufacturing, Energy, Automotive and Automation
- Engineering Supervisor
- Maintenance Engineer
- Associate Design Engineer
- Technical Sales Advisor
- Technical Trainer.

About the course

Manufacturing engineering is the branch of engineering that oversees the complex process of making things on a large scale.

Manufacturing engineers design the processes, the systems and the tools used in the manufacturing of a product. They ensure that the plant works efficiently and effectively to produce high quality products, often incorporating automated and robotics systems.

Career opportunities

There is an unprecedented demand for Manufacturing Engineering Graduates locally, nationally and internationally in the pharmaceutical and biomedical industries, precision engineering and manufacturing companies as well as in design and automation specialists.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This programme focuses on agricultural science, agri-business, agricultural engineering and agricultural systems.

Students will develop knowledge in areas such as sensing technology, electro-pneumatics, electro-hydraulics, automation, agribusiness, management, marketing and product pricing.

It is also envisaged that graduates of this programme will achieve Young Trained Farmer status.

Career opportunities

The main areas of employment for graduates of this programme are:

- Design of agricultural machinery and equipment
- Control system design
- Agri systems testing and maintenance
- Advising the agrifood industry
- Design of agricultural/food processing infrastructural works.

Year 1 Modules

Semester 1

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Bachelor of Science (Honours) in TV & Media Production is a hands-on course that covers a wide range of media skills. Students will find themselves immersed in the practical world of media, working together to create productions for TV, radio and online.

This course allows students to develop and apply practical skills in writing, editing, camera, sound and graphics over four years. Students will complete a work placement in year 3. It also provides students with the theoretical knowledge and legal backdrop

for their future careers in TV & media production.

Career opportunities

The range of career options open to graduates of this course is extensive and varied. It includes roles such as:

- Production Crew
- Researcher for Factual Programmes
- Video Editing & Motion Graphics
- Media Entrepreneur
- Director / Producer for TV.

Year 1 Modules

Semester 1

Intro to TV Studio Production 1
Intro to Production
Visual Culture
Intro to Audio
Principles of Light

About the course

The Bachelor of Science in TV & Media Production is a hands-on course. Students will be immersed in the practical world of media, working in teams on their productions.

Graduates of this course will be equipped to:

- Research, plan and manage TV and film productions
- Film and edit their footage to high standards
- Create motion graphics to professional broadcast standards

- Understand the legal requirements associated with commissioning and broadcasting.

Career opportunities

The range of career options open to graduates of this course is extensive and varied. It includes roles such as:

- Production Crew
- Researcher for Factual Programmes
- Video Editing & Motion Graphics
- Media Entrepreneur
- Director / Producer for TV.

About the course

This degree provides graduates with key skills for media and creative industries including radio and television presentation, video editing, digital design, media writing and journalism.

Expert knowledge and state-of-the-art facilities prepare graduates for a range of workplaces including radio, social media and exciting roles in the communications departments of local and global companies.

The course combines a mix of practical and theoretical media and PR subjects.

Career opportunities

Students graduate with business knowledge, technical know-how and a digital portfolio of their creative work.

Career opportunities include communications departments of global businesses, radio stations, online media companies and many graduates go on to set up their own independent companies.

This degree provides learners with all the skills they need to start a career in these exciting and fast-paced environments.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Product Design Innovation degree at SETU is a dynamic blend of art and engineering, harnessing creativity and imagination to design solutions for new product development. It offers a deep understanding of human-centric design, driven by insights into how people live, work, and play. Our students become proficient in tools like SolidWorks, Photoshop, and Illustrator, enhancing their problem-solving, making, doing, and teamwork skills. The course leverages design thinking and research to create solutions that improve people's

lives and performance, highlighting design as a creative, collaborative, and life-enhancing pursuit.

Career opportunities

Our graduates enjoy diverse career opportunities. The skills they acquire, including critical thinking, creativity, problem solving, and complex decision making, are applicable across various industries. Design specific paths include in-house design, design consultancies and the entrepreneurial path of freelance design. Their versatility opens doors to careers in product design, UX design, medical device design, sustainable design, service design and beyond. The programme equips graduates for a range of career paths including the skills and confidence necessary to bring their own innovations to market.

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

The Design degree at SETU promotes the practical application of creativity, integrating technical expertise, originality, and aesthetics. Effective design streamlines our interaction with daily products, applications, and services, making them intuitive, efficient, and enjoyable. It encompasses all aspects from physical items and app interfaces to packaging and visual communication, emphasising creative problem-solving, hands-on work, communication, and teamwork.

The programme utilises studio and workshop in conjunction with tools such as SolidWorks, Photoshop,

and Illustrator, in the creation and improvement of our everyday experiences.

Career opportunities

Our graduates enjoy diverse career opportunities. The skills they acquire, including critical thinking, creativity, problem solving, and complex decision making, are applicable across various industries. Design specific paths include in-house design, design consultancies and the entrepreneurial path of freelance design. Their versatility opens doors to careers in product design, UX design, medical device design, sustainable design, service design and beyond. The programme equips graduates for a range of career paths, underlining the broad employability of our alumni.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Visual Communications and Design is a problem-solving studio practice that uses image, text, print and screen to communicate messages.

Based around the principles and processes of graphic design, students incorporate traditional skills of illustration, printing, photography, typography and other graphic processes with the digital realms of video, web and screen design.

Career opportunities

Our graduates are employed across a wide range of sectors.

From advertising agencies to printing companies, from web design companies to in-house designers.

Specialisms include: brand designer, illustrators, web designer, app designer, UX/UI designers, photography, desktop publishing, packaging design and digital media.

Graduates also find careers in the broader areas of digital marketing.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Visual Communication also referred to as graphic design covers several topics such as illustration, typography, print and screen graphics, packaging and page layout.

The course includes the creation of artwork for the print and screen graphic using traditional skills and design software packages, ie the Adobe suite and Apple Macintosh computers.

Career opportunities

Graphic Designer in a Graphic Design Company or as an In-house Graphic Designer in a large company, or as a sole trader.

Graphic designers can work in packaging, corporate identities, advertising, book publishing, illustration, printed or screen graphics and typography.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Art as a subject taught at third level encourages self-expression and creativity while building confidence and creative skills as well as a sense of individual identity.

Most important, studying Visual Art at SETU helps to develop students critical thinking and the ability to interpret the world around us through determination and resilience while opening up new possibilities.

Career opportunities

Graduates of the programme may find

work in the following areas:

- Professional Artists
- Community Artists
- Art Teacher
- Arts Administrator
- Workshop Facilitator
- Arts Management
- Photography
- Gallery Curator.

Follow on study options:

- Masters in Fine Art
- Taught MA in Art & Heritage Management
- Masters by Research
- Art & Design Education.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The Bachelor of Laws (Honours) (LLB) is a full-time four-year programme that is both challenging and stimulating.

As well as providing a broad based legal education, our law degree equips students with analytical, problem-solving, communication and research skills.

Career opportunities

Career opportunities are diverse. Many graduates pursue legal professional careers e.g. solicitor or barrister. Others pursue careers where legal knowledge is relevant and advantageous including careers in banking, finance, insurance, governance, public service, journalism and politics.

The degree is recognised by the Law Society and an approved degree for entry to King's Inns.

Carlow	SE405	Round 1: 287	2 subjects: H5 4 subjects: O6/H7 English: O3/H6	John Tully LLM E: john.tully@setu.ie
	LEVEL 8	COURSE DURATION 3 YEARS		

About the course

The LLB is a traditional law degree offering a curriculum of core and elective law subjects.

Students are supported in acquiring substantive legal knowledge, skills in legal research and analysis, and both written and verbal communication.

The course seeks to impart a sound understanding of law and the intellectual foundations necessary to prepare for a career as a legal professional.

Career opportunities

The LLB provides excellent preparation for work in a legal capacity in both the public and private sectors with most graduates undertaking professional training to qualify as a solicitor or barrister. However, there are many other careers for which a law degree is valuable, such as journalism, business, financial services, politics, human resources, research, policing, and academia.

The degree is recognised by the Law Society and an approved degree for entry to King's Inns.

Arts

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE200	Round 1: AQA	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7	Erin McNamara Cullen MA E: erin.mcnamara@setu.ie
	LEVEL 8	COURSE DURATION 3 YEARS		

About the course

Our Joint Honours Arts Degree offers students a wide range of subject combinations allowing students the opportunity to delve deeper into an area they have already experienced and enjoyed, or to explore new areas and find new passions.

Arts degrees develop a student's ability to explore complex issues and challenge difficult questions, mindful of the wide diversity of perspectives and the need to act with integrity.

Arts graduates are known for their communication, creativity and

problem-solving skills; we focus on developing the ability to approach modern issues with the

critical and analytical skills necessary to ensure students are grounded in their areas of study, while also future focused.

Career opportunities

Graduates gain employment in a diverse range of careers. Students can access postgraduate degrees that develop one or both of their undergraduate subject areas, or move into other complimentary areas at Masters and PhD level.

Study Abroad is available on this degree, extending your degree by one year. Students who opt in graduate with a BA (Hons) International.

Year 1 Modules

First year is a time for students to work out what each of the subject areas is about. Students choose 3 subjects in first year from our subject offering and gain an understanding of each of these both during the degree and in terms of career pathways.

In first year, students take introductory modules in 3 subjects from:

- Social Sciences
- Languages
- English
- Theatre Studies
- Religious Studies
- Psychology
- Law.

At the end of first year, students choose 2 of these for the remainder of their degree.

Bachelor of Arts (Honours) Hospitality Management

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE921	Round 1: 307	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Fabrice Bartholin MBA E: fabrice.bartholin@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This four year course is designed to equip graduates with a broad range of business skills combined with a thorough knowledge of the hospitality environment.

During the first semester of year 3, students are required to complete a placement in a hospitality organisation.

Students may also undertake an Erasmus programme to study abroad for the second part of their third year.

Career opportunities

Students who complete the BA (Honours) in Hospitality Management can expect to find work opportunities at the junior management level in operations, human resources, finance or sales and marketing departments in a hotel.

Graduates can also consider careers in entertainment venues, restaurants, bars, casual dining, event management and contract catering.

Year 1 Modules

Semester 1

Communications for Tourism & Hospitality
Intro to Management
Intro to Marketing
Intro to Tourism & Hospitality Operations
Restaurant Service
*One elective**

Semester 2

Accommodation Supervision
Beverage & Wine Studies
Information Communication Technology
Marketing Mix for Tourism & Hospitality
Front Office Fundamentals
*One elective**

* The full list of each semester's elective subject options is available on the relevant course page of our website.

Bachelor of Business Tourism & Hospitality Services

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE924	Round 1: 200	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Fabrice Bartholin MBA E: fabrice.bartholin@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

This course is a three year full-time level 7 programme designed to provide students with the knowledge and skills required to perform effectively at the supervisory level within the tourism and hospitality services sector.

The programme aims to provide students with strong operational, business, management and marketing skills to enhance their supervisory expertise.

During the first semester of year 3, students will complete a placement in Ireland or abroad in a hotel or a tourism site.

Career opportunities

The programme will enable graduates to perform effectively in a supervisor role in their chosen employment in Tourism or Hospitality services.

After successful completion of the programme, students also have the opportunity to progress to the level 8 BA (Honours) in Hospitality Management offered at the University.

Year 1 Modules

Semester 1

Communications for Tourism & Hospitality
Intro to Management
Intro to Marketing
The Tourism System
Restaurant Service
*One elective**

Semester 2

Information Communication Technology
Marketing Mix for Tourism & Hospitality
Tourism Studies
Accommodation Supervision
*One elective**

* The full list of each semester's elective subject options is available on the relevant course page of our website.

Bachelor of Science (Honours) Tourism & Event Management

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Wexford	SE922	Round 1: 281	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Edmund Joyce MA E: edmund.joyce@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Tourism is one of Ireland's most important growing economic sectors supporting jobs on both a national and international level.

The tourism industry is largely driven by the sustainable promotion of natural and cultural heritage. A certificate in Regional Tour Guiding is available after Year 2.

Festivals and events are critical for tourism growth as they specifically attract both domestic and overseas visitors to Ireland and contribute significantly to the economy every year.

Career opportunities

Students on this course will develop a strong management background in the context of tourism and event management, this combined with transferable life skills will enable them to take up full-time positions in a diverse range of careers such as:

- Festival manager
- Event organiser
- Marketing executive
- Tourism executive
- Event planner
- Fundraising officer
- Entrepreneur.

Year 1 Modules

Semester 1

Introduction to Tourism
Academic & Professional Skills
Statistics & Forecasting
Principles of Event Management
Irish Natural Heritage & Landscape
Digital Skills 1

Semester 2

Customer Service in Practice
Irish Cultural Heritage
Introduction to Tourism
Investment Maths
Event Management
Digital Skills 2

Bachelor of Science Tourism & Event Management

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

The course combines tourism and event modules with a strong business and entrepreneurial focus.

Event management has become an integral element of the Irish tourism offering. From project management, to designing websites, to understanding key management issues, this course equips students with the required knowledge and skill set to develop careers in this area. A certificate in Regional Tour Guiding is available after Year 2.

Career opportunities

Students on this course will develop a strong management background in the context of tourism and event management, this combined with transferable life skills will enable them to take up full-time positions in a diverse range of careers such as:

- Festival manager
- Event organiser
- Marketing executive
- Tourism executive
- Event planner
- Fundraising officer
- Entrepreneur.

Bachelor of Arts (Honours) Culinary Arts

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE923	Round 1: 269	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Mark Gaffney E: mark.gaffney@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This is a full-time, four year, level 8 programme of innovative and dynamic culinary study.

We teach you all the traditional culinary skills, but also include a number of other disciplines such as food innovation, media and visual arts, food policy, speciality food production, sustainable practices and gastronomy.

Career opportunities

Our graduates have an international reputation for excellence.

Many are employed in leadership roles in restaurants, bars, bakeries, food product development, food retailing and food education, both nationally and internationally.

A growing number of graduates also open and develop their own businesses.

Semester 1

Critical & Creative Thinking
Food Safety & Technology
Fundamentals of Culinary Skills
Intro to Gastronomy

*Elective options**

Semester 2

Development of Culinary Skills
Development of Modern International Gastronomy
Information & Communication Technology

Nutrition & Scientific Principles

*Elective options**

* The full list of each semester's elective subject options is available on the relevant course page of our website.

Higher Certificate in Arts Culinary Arts

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE938	Round 1: 133	5 subjects: O6/H7 English or Irish: O6/H7	Edward Hayden MA E: edward.hayden@setu.ie
	LEVEL 6	COURSE DURATION 2 YEARS		

About the course

This two year programme is a fast paced course to prepare students for the culinary industry.

The course boasts an extensive selection of hands on practical modules married with some theoretical modules to afford students the opportunity to understand the underpinning theory and allow it to be the foundation to their practical endeavours.

Career opportunities

On successful completion of the programme a myriad of exciting opportunities are available to graduates including incremental progression in all culinary/hospitality providers, in positions of all grades as well as opportunities to travel and for further education.

Other opportunities may present to work in the wider food related circles and industries.

Progression

Successful completion of this programme allows students the opportunity to progress onto the BA (Hons) Culinary Arts programme.

Year 1 Modules

Semester 1

Academic Learning
Culinary Skills 1.1
Exploring Cookery
Food Safety & Culinary Science
Live Service 1.1
Pastry 1.1

Semester 2

Culinary Skills 1.2
Live Service 1.2

Cost Control for Culinary Operations

SCIENCE

COMMON ENTRY Science (Carlow)

COURSE CODES	STREAMS	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
SE500	Biosciences with Biopharmaceuticals Brewing & Distilling Pharmaceutics & Drug Formulation	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Gary Cahill PhD E: gary.cahill@setu.ie

About the course

A Common Entry course is a popular choice for students who have an interest in a discipline but are unsure of what career path they would like to follow. Common Entry courses allow students to study a broad range of subjects initially and then choose their preferred specialist area. This allows students more time to discover what interests them most.

Course structure

The first year of this course provides students with a foundation in science, and subjects are common for all students. After Year 1, students separate into their

chosen specialist area from the following:

- Biosciences with Biopharmaceuticals
- Brewing & Distilling
- Pharmaceutics & Drug Formulation

The course offers a blend of academic and practical skill development and work placement.

Career opportunities

This course allows graduates to gain an understanding of a solid science foundation, while also ensuring students have time to explore a wide range of career options. The course is designed to produce highly employable graduates to work within

the biopharmaceutical, biotechnology and brewing and distilling industries. These sectors are rapidly evolving and offer excellent and varied employment options. Skills can be utilised globally so there are endless international opportunities.

Year 1 Modules

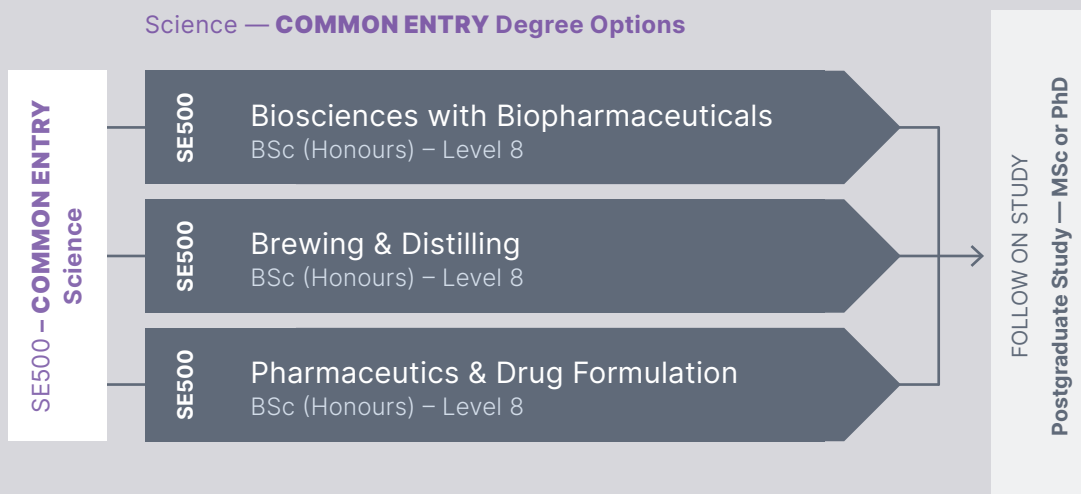

Semester 1

Fundamental Biology
 Chemistry 1

COMMON ENTRY — Bachelor of Science (Honours) Biosciences with Biopharmaceuticals

LOCATION	COURSE CODE	CAO POINTS 2024	COMMON ENTRY ROUTE	STREAM LEAD
Carlow	SE500	Round 1: 279		SE500 (Level 8) Science (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Bioscience is the branch of science concerned with living organisms and is the foundation of many other schools of scientific inquiry, including biopharmaceuticals, which refers to medical drugs manufactured in living organisms such as bacteria, yeast and mammalian cells.

Career opportunities

The four year Biosciences with Biopharmaceuticals course is designed to produce highly employable graduates for the bioscience, biotechnology, biopharmaceutical science and food science industries.

These sectors are rapidly evolving and offer excellent and varied employment options in quality control, quality assurance, technical, supervisory or management areas.

Year 2 Modules

Semester 1

Instrumentation
Quantitative Methods and Quality Control 1
Fundamentals of Microbiology 1
Molecular Biology 1
Biochemistry Biomolecules

Semester 2

Analytical Techniques
Pharmaceutical Science
Quantitative Methods and Quality Control 2
Fundamentals of Microbiology 2
Molecular Biology 2
Biochemistry Metabolism

Carlow	SE500	Round 1: 279		SE500 (Level 8) Science (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The purpose of this course is to produce graduates with the skills to make new pharmaceutical products, trouble-shoot problems in the stability of existing products, and in production proper.

This course is for you if you like science, enjoy analytical activities and problem solving, and want to study a course with a high level of practical laboratory work.

Career opportunities

- Primary and secondary pharmaceutical production
- Pharmaceutical product development and manufacture
- Quality control in high-volume mass-market manufacturing plant
- Cleanroom and water-treatment facilities.

Year 2 Modules

Semester 1

About the course

Successful brewing and distilling requires the application of both scientific and engineering principles.

This four year course equips students with the necessary scientific knowledge and instrumentation competencies to work in the brewing and distilling industry.

Modules include product development, marketing and regulatory affairs. The course incorporates industry work placement in Year 3 and a research project in Year 4.

Career opportunities

This course in brewing and distilling is the first degree of this type in Ireland.

We work closely with industry to ensure that all graduates from the programme will directly meet the requirements of their future employers in the brewing and distilling industries but will also be in a position to enter a research career, undertake further studies or start up their own venture.

About the course

Science (Common Entry) was designed for the student who has a keen interest in science, but is unsure of which area they would like to specialise in. This course gives the student a flavour of a variety of different scientific disciplines, allowing them to keep their options open when applying to study science at third level. This is a highly regarded hands-on practical based programme.

The modules of this course offer a good grounding in biology, chemistry, physics, mathematics, computing and good laboratory practice.

Students will study many lab and theoretical modules in first year.

Career opportunities

Career opportunities will be subject to your choice of specialist exit pathways. Science (Common Entry) is the gateway for four Level 8 BSc (Honours) degrees in SETU Waterford, which include the BSc (Honours) in Food Science and Innovation, BSc (Honours) in Molecular Biology with Biopharmaceutical Science, BSc (Honours) in Pharmaceutical Science, and BSc (Honours) in Physics for Modern Technology.

About the course

This four year honours degree course can be chosen within the SE501 - Bachelor of Science (Honours) Common Entry Route.

You will be trained in processes such as analytical testing, advanced molecular biology techniques, microbiological analyses, biopharmaceutical technology and cell culturing techniques. You can choose between Work Placement or Study Abroad in Semester 2 of third year.

Career opportunities

Industry needs suitably qualified graduates with hands-on practical experience

to be part of exciting developments in biopharmaceutical and related sciences. This course is designed to train you to work in the biopharmaceutical, biomedical, and/or food related industries.

The course will also train you for progression to further study such as postgraduate research and/or teaching.

* ENTRY RECOMMENDATION

Applicants should note that a science subject (Biology, Chemistry, Physics, Physics with Chemistry or Agricultural Science) at Leaving Certificate is recommended for this programme.

About the course

This course will provide graduates with the skills to work in the various sectors of the food industry from food production to marketing and regulation.

The degree will train you in food manufacture, analysis, safety and nutrition in addition to marketing and innovation, giving you key skills for your future career. Industrial placement or study abroad option takes place in third year.

Career opportunities

Graduates have a wide range of excellent career opportunities with national and

international companies in:

- Product innovation
- Production management
- Food quality assurance
- Sales and marketing
- Food business entrepreneur.

Graduates from this course also have the opportunity to progress to postgraduate study at both masters and PhD level.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This is a four year honours degree, which includes a semester of work placement. The course is interdisciplinary providing students with an understanding of the physics underlying modern technologies such as semiconductors, optics/photonics, renewable energy, and sensor systems. Students develop complementary skills in the areas of physics, engineering, mathematics and programming. They develop associated skills in problem-solving, communication, research methods, team-work and leadership.

Career opportunities

Graduates of this degree develop a range of transferable skills that are valued and much sought after by industry. Graduates find employment in industry and research in a range of sectors including: semiconductors, telecommunications/photonics, medical physics, biomedical devices, environmental science, renewable energy, automotive, meteorology, software development, ICT, teaching, astronomy and astrophysics.

About the course

This stream from our Science common entry course aims to prepare graduates for the highly regulated pharmaceutical and biopharmaceutical industries.

Students gain experience in a broad range of scientific subject areas and laboratory instrumentation. A nine-month work placement is included in the third year of the course. A research project is also carried out in year 4.

Career opportunities

There is a very strong demand for graduates qualified in pharmaceutical science.

The South-East region has a hub of pharmaceutical and biopharmaceutical companies and SETU has well established links to these. Our graduates work as:

- Senior laboratory analysts
- Instrumentations specialists
- Quality Assurance specialist
- Industrial researchers
- Teachers (*Following PME).

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

This course enables graduates to obtain a worthwhile degree qualification after three years of study.

Students will study a broad range of science subjects that are of relevance to the pharmaceutical and related industries, and are important for the discovery, development and manufacture of drugs. A final year project allows the student to work independently on a relevant research area.

Career opportunities

Pharmaceutical scientists design and develop new drugs, and devise cleaner, more efficient processes to manufacture them. Employment opportunities for pharmaceutical science graduates are excellent and extensive.

Graduates have found widespread employment in Ireland's growing pharmaceutical industry in areas such as quality control, quality assurance and product research and development.

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

Analytical scientists use a variety of instruments and chemical methods to identify and measure substances in different kinds of sample. Their work helps to ensure the safety and quality of food and pharmaceutical products, to protect our environment by assuring compliance with regulations, and to diagnose diseases.

The course emphasises practical laboratory skills and hands-on experience in the use of analytical instruments.

Career opportunities

Our graduates are proficient in the use of analytical techniques and instruments, resulting in excellent employability. They work in industry and government agencies, using their skills to test samples, analyse data, and develop new analytical methods. Graduate typically work in areas such as:

- Pharmaceutical production and product development
- Quality control and quality assurance
- Food and beverage analysis
- Environmental monitoring.

Carlow	SE515	Round 1: 246	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Rosemary O'Hara PhD E: rosemary.ohara@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

Bioscience is the branch of science concerned with living organisms and is the foundation of many other schools of scientific inquiry, including biopharmaceuticals, which refers to medical drugs manufactured in living organisms such as bacteria, yeast and mammalian cells.

Career opportunities

The three year Biosciences with Biopharmaceuticals course is designed to produce highly employable graduates for the bioscience, biotechnology, biopharmaceutical science and food science industries.

These sectors are rapidly evolving and offer excellent and varied employment options in quality control, quality assurance, technical, supervisory or management areas.

Year 1 Modules

Semester 1

Fundamental Biology
Chemistry 1
Physics 1
Laboratory Science
Quantitative Methods 1

Semester 2

Animal & Human Biology
Chemistry 2
Physics 2
Quantitative Methods 2
Current Concepts in Science

Higher Certificate in Science

Applied Biology or Applied Chemistry

	LEVEL 6	COURSE DURATION 2 YEARS		

About the course

This course provides students with a grounding in scientific knowledge and skills. More than 50% of the content is practical lab based work.

In Year 2, students specialise in either Applied Biology or Applied Chemistry.

This course will provide students with practical skills in bioanalysis, biotechnology, genetics, and biopharmaceutical science.

Career opportunities

The course will provide graduates with knowledge and practical skills necessary to pursue technical careers in the areas of industrial chemistry, pharmaceutical manufacture, scientific instrumentation, quality control, food science and technology.

Students who complete the Higher Certificate in either Applied Biology or Applied Chemistry may gain employment as laboratory technicians. Many students choose to continue their studies at SETU in the areas of biosciences, analytical science, pharmaceuticals and drug formulation.

Year 1 Modules

Pharmacy Technician Studies

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE937	Round 1: 225	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7 Garda vetting required	David Phelan PhD E: PTQueries.cw@setu.ie
	LEVEL 6	COURSE DURATION 2 YEARS		

About the course

A pharmacy technician is a key member of the pharmacy team involved in the safe dispensing of medicines.

This programme prepares students for this role and provides a blend of academic knowledge, hands on experience and real word learning. Students attend on campus classes and practicals and complete a weekly work placement in a community pharmacy.

In Year 2 students benefit from a six month placement in a hospital or community pharmacy.

Career opportunities

Graduates are employed as pharmacy technicians in community pharmacies and hospital settings.

Year 1 Modules

Semester 1

Human Physiology
Drugs & How They Work 1
Pharmaceutical Chemistry
Over the Counter
Pharmacy Calculations & Computing

Semester 2

Regulations & Dispensing
Drugs & How They Work 2
Formulation & Compounding 1

AGRICULTURE, HORTICULTURE & FORESTRY

Bachelor of Science (Honours) Agricultural Science

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE502	Round 1: 379	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Michael Breen PhD E: michael.breen@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Agricultural Science is the application of science and other disciplines to the production of quality food.

The purpose of the course is to prepare students for a career in the areas of agricultural science and agri-business.

Self-management, teamwork, business awareness, problem solving, land management and communication are all areas which are strongly incorporated into the programme.

Career opportunities

Graduates from BSc (Honours) in Agricultural Science can expect to find employment in the following areas:

- Senior technical positions in quality control in agri-food industries
- Sales and marketing departments of agri-businesses
- Technical personnel in organisations offering environmental and other services to farmers
- Start-up agricultural-based businesses.

Year 1 Modules

Semester 1

Introductory Biology
Introductory Chemistry
Introductory Physics
Good Lab. Practice & Core Skills
Introductory Mathematics
Intro to ICT for Scientists

Semester 2

Physical & Organic Chemistry
Cell Biology & Biochemistry
Physics for Scientists
Mathematics for Scientists
Animal Biology
Plant Biology

Bachelor of Science Agriculture

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE508	Round 1: 338	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Tony Woodcock PhD E: tony.woodcock@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

The first two years of the course concentrates on equipping the student with the knowledge and skills needed to manage a modern commercial farm.

The third year aims to expand the student's business, managerial, scientific and IT skills.

This is a very practical course and it fulfils the requirements for stamp duty exemption or land transfer for young farmers (Green Cert.)

Career opportunities

Graduates from BSc in Agriculture may find employment in fields such as:

- Managers of modern farm enterprises
- Managers in agri-food cooperatives
- Managers in meat processing plants
- Sales positions in agribusiness.

Progression

BSc (Hons) in Land Management in Agriculture.

Year 1 Modules

Semester 1

Intro to Farm Accounts
Plant Biology
Communication Skills for Agriculturists
Computer Applications
Mechanisation & Safety
Intro to Animal Breeding & Welfare

Semester 2

Chemistry for Land Sciences
Agriculture in the Economy
Animal Biology
Animal Production
Mathematics and Physics for Agriculture
Tillage Crop Production

Bachelor of Science (Honours)

Sustainable Farm Management & Agribusiness

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Wexford	SE503	Round 1: 262	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Stephen Whelan PhD E: stephen.whelan@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

The agri-food sector is one that constantly evolves to rise up to new challenges and capitalise on new opportunities.

The BSc (Honours) in Sustainable Farm Management and Agribusiness is a well-balanced degree that combines theory and hands-on learning in the agri-sciences, agri-business and land based training that are required for graduates to be successful in the industry.

In year two there is an option to choose an Organic Agricultural Stream.

Career opportunities

Employment opportunities for graduates from the level 8 in Sustainable Farm Management and Agribusiness include: farm advisory services, agricultural officers in state and semi-state organisations, technical sales and agri-finance.

Continuing your studies to level 9 or level 10 at SETU.

Year 1 Modules

Semester 1

Applied Physics & Chemistry
Principles of Crop and Grassland Production
Farm Health & Safety
Academic & Personal Skills Development

Semester 2

Basic Mathematics
Animal & Plant Biology
Principles of Animal Production
Farm Mechanisation & Regulations
Agribusiness Management

Bachelor of Science

Sustainable Farm Management & Agribusiness

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Wexford	SE509	Round 1: 211	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Stephen Whelan PhD E: stephen.whelan@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

The agri-food sector is one that constantly evolves to rise up to new challenges and capitalise on new opportunities.

This level 7 degree, offers a learning environment that combines theory as hands-on learning.

Upon graduation, learners will have acquired an analytical and entrepreneurial skill set that will allow them to thrive as employees or as a self-employed individual.

In year two there is an option to choose an Organic Agricultural Stream.

Career opportunities

Graduates from the BSc in Sustainable Farm Management programme have many employment opportunities including: farm owners, farm managers, technical roles in Government and other state agencies.

Progression to the Level 8, BSc (Honours) in Sustainable Farm Management is also possible.

Year 1 Modules

Semester 1

Applied Physics & Chemistry
Principles of Crop and Grassland Production
Farm Health & Safety
Academic & Personal Skills Development

Semester 2

Basic Mathematics
Animal & Plant Biology
Principles of Animal Production
Farm Mechanisation & Regulations
Agribusiness Management

Bachelor of Science Horticulture

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Kildalton and Waterford	SE506	Round 1: 242	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Cara Daly PhD E: cara.daly@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

SETU's BSc in Horticulture course is a full-time, three year course designed to train professional horticulturists.

Our students study STEM-rich horticulture modules, undertake work placement, gain business acumen, and graduate from the course having specialised in two major streams of horticulture study.

Progression

The add-on year BSc (Hons) in Land Management (in Horticulture) will upgrade your L7 degree to a L8 qualification.

Career opportunities

Craft Gardener in public parks, private or heritage gardens, Greenkeeper, Nursery Stock Producer, self-employed Landscaper/Landscape Designer, Garden Maintenance Contractor, Fruit/Vegetable Producer, Florist, Horticulture Teachers and Lecturers, Hort Therapists, Mushroom Grower, Tree Surgeon/Arboriculturist, Garden Centre Owner/Manager, Tree/Bedding Plant Producer, Research Scientist

Further training opens opportunities to research in plant science, pathology, or ecology.

Year 1 Modules

Semester 1

Communication Skills & Computer Applications
Horticulture Skills 1
Plant Biology
Plant Knowledge 1
Plant Protection
Soil & Growing Media

Semester 2

Chemistry for Land Scientists
Horticulture Building Construction
Horticulture Mechanisation & Safety
Horticulture Skills 2
Plant Knowledge 2
Plant Propagation

Bachelor of Science Horticulture

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
National Botanic Gardens Dublin	SE507	Round 1: 179	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Cara Daly PhD E: cara.daly@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

This is a three year level 7 course delivered with our partners Teagasc College of Amenity Horticulture based in the National Botanic Gardens.

You will benefit from the skills and expertise of staff and have access to the plant collection.

In Year 2 you will spend a semester on work placement in Ireland or abroad where you will train to be a professional horticulturist.

Career opportunities

Industry constantly requires trained, skilled and knowledgeable horticulturists in the areas of: Growing Fruit and Vegetables, Green keeping, Nursery Stock Production, Craft gardening, Landscaping, Garden Centre Management, Teaching, Landscape Design, Sports ground maintenance, Arboriculture.

Further training opens opportunities to research in plant science, pathology, or ecology.

Progression

The add-on year BSc (Hons) in Land Management (in Horticulture) will upgrade your L7 degree to a L8 qualification.

Year 1 Modules

Semester 1

Communication Skills & Computer Applications
Horticulture Skills 1
Plant Biology
Plant Knowledge 1
Plant Protection
Soil & Growing Media

Waterford	SE505	Round 1: 270	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Tom Kent MSIF E: tom.kent@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

The BSc in Forestry is aimed at providing students with the education, knowledge and skills to start a professional career in sustainable forest management. Practical classes and field trips are an essential element of all modules, to apply technical skills and demonstrate forest practices. All students undertake a semester of forestry placement in second year or students may opt to study abroad. On completion, students may progress onto the top-up one year Level 8 BSc in Land Management in Forestry.

Career opportunities

A professional forester's role is to manage trees and forests for climate, environmental and social benefits, while also producing wood, a sustainable and renewable material used in construction, furniture, joinery, paper, energy and bio-refining of chemicals. Sustainable forest management is a global imperative for a healthy planet and people. Our graduates work with Coillte, Teagasc and the Department of Agriculture, Food and the Marine and a wider range of private forest management companies, wood processing industries in Ireland and internationally. BSc in Forestry graduates are entitled to register as a DAFM Approved Forester.

Year 1 Modules

Semester 1

Plant Biology
Forest Establishment
Mechanisation & Safety
Dendrology
Mathematics for Forestry
Communication Skills & Computer Applications

Semester 2

Forest Surveying & Mapping
Fundamentals of Forestry
Wood Science
Earth Science

About the course

This is a four year full-time programme which prepares students for an exciting career in the fast-paced world of technology. Students are introduced to the fundamentals of computer science and over the four years, build up their knowledge of software development, computer systems, networking and data science. Students choose a specialist stream from Year 2 onwards.

Career opportunities

Graduates of Computer Science are amongst the most sought-after computing professionals in Ireland today. As well as working directly in the IT industry, graduates are also employed in sectors that have been profoundly changed by technology, such as healthcare, media, finance, logistics, pharmaceuticals and agriculture. There are also opportunities for postgraduate study.

COMMON ENTRY — Bachelor of Science (Honours) Computer Science (Automotive & Automation Systems)

LOCATION	COURSE CODE	CAO POINTS 2024	COMMON ENTRY ROUTE	STREAM LEAD
Waterford	SE600	Round 1: 309		SE600 Computer Science (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS	Brendan Jackman, MTech E: brendan.jackman@setu.ie	

About the course

This is a specialism within Computer Science. Advances in automotive technology have resulted in a rapid growth in innovative features such as driverless cars and collision avoidance.

These features require sophisticated software that can sense and interpret the environment around them.

Career opportunities

Roles available to graduates of this programme include:

- Automotive Software Developer
- Embedded Systems Developer in the automation, robotics and medical devices industries
- System integration roles with major car manufacturers and suppliers
- Control systems development for motor sport.
- Process control software developer
- There are also opportunities for follow on study.

Year 2 Modules

Waterford	SE600	Round 1: 309		SE600 Computer Science (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS	Richard Frisby, MSc E: richard.frisby@setu.ie	

About the course

This is a specialism within the Computer Science (Common Entry) programme. The stream is designed to equip students with a practical understanding of Operating Systems and the tools required to deploy, manage and troubleshoot the underlying infrastructure supporting networked systems.

Career opportunities

Graduates who are able to configure, manage and troubleshoot applications and services in cloud based systems are in high demand across many domains.

Recent graduates are eagerly sought after by many local companies such as Red Hat, Errigal, Done Deal, Sun Life Financial Services as well as international organisations.

There are also opportunities for postgraduate study.

Year 2 Modules

Waterford	SE600	Round 1: 309		SE600 Computer Science (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS	Dr John Sheppard , PhD E: john.sheppard@setu.ie	

About the course

The course is designed to equip graduates with the skills and knowledge needed to secure, monitor and examine electronic crime scenes and digital environments.

Criminal prosecutors have used computer forensic evidence to form the backbone in cases through the use of technologies such as smartphone forensics. The course covers programming, computer networks, operating systems and web technologies.

Career opportunities

The domain of computer security and forensics is growing and has become more essential than ever before.

Virtually all organisations now need and use internet technologies in their daily business.

Many companies employ full-time security personnel to fulfil these roles, whilst other organisations outsource them to external firms. There are also opportunities for follow on study.

Waterford	SE600	Round 1: 309		SE600 Computer Science (Common Entry)
	LEVEL 8	COURSE DURATION 4 YEARS	Dr Frank Walsh , PhD E: frank.walsh@setu.ie	

About the course

This is a specialism within Computer Science (Common Entry) programme. Internet of Things (IoT) refers to everyday objects which have the ability to harvest and process information and the connectivity capabilities to communicate the results.

IoT enables and facilitates smart cities and smart agriculture as well as improvements in industrial applications, emergency operations, health and home automation.

Career opportunities

Be a programmer and a maker! Be a hacker and a creator! The skills you acquired from this programme place graduates in a unique position - top class programming abilities combined with a solid understanding of how electronic devices are designed, configured and managed.

There are also opportunities for postgraduate study.

About the course

This is a specialism within the Computer Science (Common Entry) programme. Students develop a portfolio of playable games and game prototypes using high-level game development tools such as Unity, Unreal, C# and JavaScript.

Students also develop skills to enable them to create games ranging in technical complexity from indie and casual games up to AAA high-end commercial games.

Career opportunities

Employment prospects in computing are extremely healthy at the moment, with demand for skilled graduates exceeding supply.

Graduates of this course will have the skills necessary to follow opportunities that present themselves in this growing industry as well as having the freedom to choose their own career path.

There are also opportunities for follow on study.

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

This course focuses on developing graduates who have a skillset that enables them to function in a wide variety of IT related environments.

In particular, it provides graduates with practical computing skills in: networking, systems administration and infrastructure, as well as web development. In addition, graduates engage in business related subjects which enable them to appreciate the need for alignment between business requirements and systems development and maintenance in modern organisations. Employers value the practical nature of the

course where graduates can hit the ground running and instantly add value to their IT Department.

Career opportunities

Currently there is a strong demand for graduates with the skill sets obtained from this degree both here in Ireland and abroad. Opportunities include:

- Database Designer & Developer
- Cloud Computing Architect
- Network Engineer
- Systems Analyst
- Data Quality Manager
- Information Technology Analyst
- Information Security Specialist.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Students who undertake this course will become aware of the value of data in storage and in transit and the need for security. When reconstructing what has happened on a digital device, they are able to adapt to the use of new tools to aid in their analysis. You will explore issues relating to system and network security as well as ethical hacking techniques for penetration testing. You will learn how to respond to a suspicious incident and the importance your actions can have. You will also learn how to collect and examine network data for types of evidence as well as to generate statistical,

session and alert information. Being a strong programmer helps with skills such as secure software development and reverse engineering. Modules in law and business help prepare you for working in a range of roles that you may pursue as a career.

Career opportunities

The domain of computer security and forensics is growing and has become more essential than ever before. Virtually all organisations now need and use internet technologies in their daily business. Many companies employ full-time security personnel to fulfil these roles, whilst other organisations outsource them to external firms. There are also opportunities for follow on study.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This program aims to produce graduates who are well-versed in a multitude of cybersecurity disciplines. Students will evaluate the security posture of IT infrastructure and software applications in a lab-based environment. By fostering proficiency in Cybersecurity fields of study, students will be empowered to develop secure and scalable solutions tailored to industry needs.

Career opportunities

Cybersecurity offers a vast array of career opportunities across various industries and sectors. Many companies, ranging

from technology firms to financial institutions, have dedicated cybersecurity teams to protect their networks, systems, and data, offering roles such as security analysts, penetration testers, and incident responders. Furthermore, the rapid expansion of cloud computing has created demand for cybersecurity specialists who can address the unique security challenges posed by these technologies. With cyber threats becoming increasingly sophisticated and pervasive, the demand for skilled cybersecurity professionals is expected to continue growing, offering abundant career prospects for those interested in this field.

About the course

This programme is designed to address the increasing demand for cybersecurity experts in today's technology-driven world. Students of this programme gain knowledge and skills in cybersecurity processes, practices, implementation and assessment of both IT infrastructure and software. With this expertise programme graduates can devise secure, adaptable and scalable solutions that meet the needs of various industries.

Career opportunities

With ever-growing concern over the privacy and security of digital information, cybersecurity has become one of the fastest growing sectors in the technology industry. Professionals with cybercrime and IT security qualifications and experience are highly sought after. Career options include roles in ethical hacking, secure network management and Security, Risk & Crisis Management fields.

	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This course equips students with the skills required to become software developers. Students learn how to collaborate creatively with people to produce software for phones, cars, tablets and computers that solve real world problems. Students follow our new 'learn-by-doing' model in Year 1.

Students cover a wide range of subjects and work placement. Year 4 concentrates on state-of-the-art, high-level topics such as: secure app development, data science, concurrent systems and a large software project.

Career opportunities

Ireland is a large global player in software development with significant employment opportunities for our graduates at home and abroad.

Graduates of this course are working with companies such as UNUM, Google, IBM, Microsoft, HP, AOL, DoneDeal, Symantec and Intel.

SETU's Bachelor of Science (Hons) in Software Development (SE603) is also offered as a tertiary degree programme with Laois and Offaly Education and Training Board. Full details of this pathway are available on page 132.

Carlow	SE609	Round 1: 263	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Dr Chris Meudec PhD E: chris.meudec@setu.ie
	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

Software development is about creating software: for mobile phones, for websites, for self-driving cars, for banking.

You will learn all the skills needed to become a successful software developer - from computer programming, project management, user interactions as well as how to work in a team.

The third year includes a six months hands-on industry work placement.

Career opportunities

Ireland is a large global player in software development: attractive job opportunities are plentiful and forecast to remain high.

Graduates of this course are working in Ireland and around the world with companies such as UNUM, Google, DELL, IBM, Microsoft, HP, AOL, DoneDeal, Symantec, Bank of America and Intel.

Graduates can also progress to our Level 8 BSc (Hons) in Software Development.

Year 1 Modules

Semester 1

Programming 1
Mathematics 1
Computer Hardware 1
Networking 1
Applications & Interpersonal Communication

Semester 2

Programming 2
Mathematics 2
Operating Systems
Computer Hardware 2
Networking 2

Bachelor of Science (Honours) Software Systems Development

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Waterford	SE604	Round 1: 300	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O5/H7	Amanda Freeman-Gater MSc E: amanda.freeman-gater@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

This four-year programme empowers students with a comprehensive understanding of software development, web development, mobile app development, and data science alongside security fundamentals. Through specialized coursework, students delve into advanced programming languages and techniques essential for software engineering. They master web development frameworks, crafting dynamic and interactive web applications. Dedicated modules in mobile app development equip students with the skills to create innovative solutions for iOS and Android platforms. Moreover,

the curriculum delves into data science methodologies, enabling students to extract insights from complex datasets. Graduates emerge with a versatile skill set, ready to meet the evolving demands of the tech industry.

Elective Streams

In the second year, students have the opportunity to specialize further by selecting an elective stream in business, psychology or a language.

We are delighted to announce our new Sports Technology stream. In this stream students will study sports biomechanics and wearable devices. This knowledge will enable our students to pave a career in the ever growing sports technology industry.

Year 1 Modules

Semester 1

Communication Skills
Computer Systems 1
Mathematical Fundamentals
Programming Fundamentals 1
Systems Analysis, Design & Testing
Website Development 1

Semester 2

Business Information Systems & Processes
Computer Systems 2
Intro to Software Engineering
Programming Fundamentals 2
Statistical Analysis
Website Development 2

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

This 3-year degree programme enables students embark on an immersive journey into the heart of software development, mobile app creation, web development, and data science. Throughout this comprehensive curriculum, students will explore the intricacies of software design and development, mastering essential programming languages and techniques. Students will acquire the skills to craft innovative applications tailored for both iOS and Android platforms. Through their study of mobile app development, students will learn how to design and build innovative applications for iOS and

Android platforms, create interactive websites using cutting-edge technologies and delve into the realm of data science, discovering how to extract valuable insights from complex datasets to drive decision-making.

With hands-on projects and real-world applications, students graduate equipped with the skills and knowledge needed to thrive in the ever-evolving field of technology.

Career opportunities

- Software Engineer/Developer
- DevOps Engineer
- Full Stack Web Developer
- Data Analyst/Engineer
- Mobile App Developer
- Web Developer.

Jacqui Woods O'Brien, MSc

E: jacqui.woodsobrien@setu.ie

About the course

The BSc (Honours) in Creative Computing provides students with the knowledge and practical experience of industry standard innovative tools and technologies, within the domains of technology and creative media.

This enables graduates to pursue a career in both the computing and creative media industry. Students study 60% computing modules and 40% creative media modules in this programme.

Career opportunities

- Web Development, Mobile App Development and Software Development
- UX (User Experience) Design
- Entertainment Sector - Animation, Film, Creative Content, Pipeline/ Production Management
- Graphic Design
- Software Support.

About the course

Creative Computing aims to provide students with the cross disciplinary skills of computing and creative media to work in today's highly dynamic digital environment.

If you would like to study a computing course and you also have a creative ability, this might be the course for you!

Students study approximately 60% computing modules and 40% creative media modules in this programme.

Career opportunities

- Web Development, Mobile App Development and Software Development
- UX (User Experience) Design
- Entertainment Sector - Animation, Film, Creative Content, Pipeline/ Production Management
- Graphic Design
- Software Support.

Higher Certificate in Science

Computing (with options in Applications or in Programming)

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE616	Round 1: 244	5 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Catherine Moloney BSc E: catherine.moloney@setu.ie
	LEVEL 6	COURSE DURATION 2 YEARS		

About the course

Computing is the study of computers and computer systems and how they are constructed and programmed. As computing increasingly impacts on every aspect of our lives, it is also becoming a more evolved and complex area.

This course provides a general overview of computing in Year 1 and includes modules in mathematics, programming, hardware, operating systems, networks and applications. In Year 2, students may choose to specialise in computer applications or programming.

Career opportunities

After this course, you will have a broad range of skills to start your career journey in one of the following areas:

- Web Development
- Network Engineering
- Software Development
- Systems Analysis
- Technical Support.

Year 1 Modules

Semester 1

Programming 1
Mathematics 1
Computer Hardware 1
Networking 1
Applications & Interpersonal Communications

Semester 2

Programming 2
Mathematics 2
Operating Systems
Computer Hardware 2
Networking 2

Bachelor of Science (Honours) Computer Games Development

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE607	Round 1: 299	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Ross Palmer MSc E: ross.palmer@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Games Development is one of the most exciting and dynamic areas of software development in which to work.

Graduates of this course are sought after by both multinational and indigenous industry leaders such as Microsoft, Black Shamrock, Aeria Games and Viridian Software.

There are currently over sixty gaming startups who are eager to scale up their operations and help position Ireland as the next big gaming hub.

Career opportunities

- Specialist software engineering role in games (Rendering / AI / Gameplay / UI / Networking).
- Engine developer (Unity3D / Unreal / Frostbite)
- Specialist software engineer in performance-related solutions to problems in all types of industry (financial trading / autonomous driving / data analytics etc.)
- Mobile app developer
- General software engineer in the commercial computing sector.

Year 1 Modules

Semester 1

Intro to 2D Digital Art
Communications Skills
Human Computer Interaction
Mathematics for Graphics
Intro to Programming

Semester 2

Concept Art for Games
Game Design
Interaction Design
Intro to Data Analytics
Intro to Object Oriented Programming

	LEVEL 7	COURSE DURATION 3 YEARS		

About the course

This course will equip you with the skills to enter one of the fastest-growing and most exciting fields in software development. Our graduates are in high demand by industry leaders, both international giants like EA and innovative Irish studios like Black Shamrock, Digit Game Studios and Viridian Software. Graduates of this programme will be part of Ireland's thriving games industry, which is rapidly gaining recognition as a global centre for game development excellence.

Career opportunities

- Specialist software engineering roles in games (Rendering / AI / Gameplay / UI / Tools / Audio)
- Engine developer (Unity3D)
- Mobile app developer
- General software engineer in the commercial computing sector.

Computing in Interactive Digital Art & Design

LOCATION	COURSE CODE	CAO POINTS 2024	ENTRY REQUIREMENTS	PROGRAMME DIRECTOR
Carlow	SE608	Round 1: 319	2 subjects: H5 4 subjects: O6/H7 English or Irish: O6/H7 Mathematics: O6/H7	Philip Bourke MSc E: philip.bourke@setu.ie
	LEVEL 8	COURSE DURATION 4 YEARS		

About the course

Interactive Digital Art and Design is one of the most inventive careers within the technology industry. As concept creators, graduates will have a direct influence on product design.

User-focused design is critical in games, applications, entertainment media, simulation, virtual reality, animation and film production.

Our award-winning graduates have secured Best User Interface Design honours for two years at the Games Fleadh and nominations for industry awards in 2024. With this proven excellence, our program prepares students to lead

in digital artistry and application development, shaping the future of technology and entertainment.

Career opportunities

Graduates will be literate in visual design within the interactive digital art space. They can work as 2D and 3D concept artists, technical artists, user experience designers, user interface designers and programmers.

Our graduates will be well-prepared to contribute to the industry. They can develop prototypes and determine the style of games, applications, and entertainment media. This course opens a wide range of digital art and design career opportunities.

Year 1 Modules

Semester 1

Intro to 2D Digital Art
Communications Skills

Intro to Data Analytics
Intro to Object Oriented Programming

Tertiary Education Programmes

SETU's tertiary degree programmes allows you to start your degree in one of our partner ETBs/FE colleges before completing your degree programme at SETU.

What are the benefits of a tertiary degree programme?

A tertiary degree programme allows you to start your degree in a smaller campus closer to home. This means reduced accommodation and travel expenses, greater study/life balance, and a smoother transition to higher education.

There are other advantages, as you can enroll for a tertiary degree programme without CAO points, once you meet the minimum eligibility requirements. Finally, there are no fees for the years of the degree programme provided by the ETB. In subsequent years, the normal registration fees will apply, and you will be eligible to apply for a SUSI grant.

For more information about tertiary degree programmes at SETU, visit: www.setu.ie/study-setu/undergraduate-study/tertiary-degrees-carlow or contact:

Sarah Sartori
E: sarah.sartori@setu.ie
T: 059 9175719.

Apprenticeship courses

An apprenticeship is a training course that gives students the opportunity to earn a salary as an employee while gaining valuable knowledge and skills in a chosen field. Training is both on-the-job and in a third level setting, combining both

practical skills and theory based knowledge for a qualification which is on the National Framework of Qualifications and is recognised internationally.

SETU Apprenticeships

Construction

- Geo Drilling – Level 6
- Brick and Stonelaying – Level 6
- Plumbing – Level 6
- Carpentry and Joinery – Level 6

Biopharma

- Laboratory Analyst – Level 7
- Laboratory Technician – Level 6

Motor

- Motor Mechanics – Level 6

Electrical

- Electrical – Level 6
- Instrumentation – Level 6
- Electrical Instrumentation – Level 6
- Electronic Security Systems – Level 6

How to become an apprentice

To find an apprenticeship, you can search apprenticeship vacancies on:

www.apprenticeship.ie.

For more information on apprenticeships at SETU visit:

www.setu.ie/apprenticeships

School Visits

School visits offer a wonderful opportunity to present details about our University, its courses, facilities and future developments to senior cycle students. To arrange a booking, please email one of our schools' liaison officers listed above.

Campus Visits

Campus visits may be requested throughout the year to enable students to see the full range of facilities on each of our campuses. To book a campus visit, please email the schools' liaison officer at the particular campus.

Careers Fairs

The University participates in many career exhibitions within the region and nationally throughout the academic year. To arrange for a member of our schools' liaison team to attend a careers fair, please get in touch with us. Contact details are listed above.
